ONE DOLLAR

From the Other Side of the Desk

The teams line up and try to beat each other's brains out. Maybe a couple of times a week.

They compete wherever they can. The talk about the last game or next one is endless.

Friendships teeter in the balance (mostly among the adults), some are resurrected, some go away forever.

It's the same in politics. But not always.

Hardeman County Sheriff John Doolen and Bolivar Police Chief Pat Baker were at the Anti-Violence March organized by El Ranchito on Tuesday and someone remarked that it was great that two opponents in the sheriff's race would come together and show each other proper respect.

Well, that's what they are supposed to do. Whatever their differences are in the election, they both agree that we need less violence and crime in our communities. They may have different ideas on how to accomplish it, but they want the same thing. Safer cities, safer citizens.

No matter who wins the election, both candidates (actually all three as Jerry Siler is running as well) agree that having safer places to live and work is the goal. At least they'd better agree on that.

I guess it would be nice if we could play ball the same way. With an eye on winning and losing, sure, but with the bigger picture in mind...of building and requiring character among young men and women. Our goal should be a safe place for our kids to play any sport.

We won't remember forever who won and lost the games, <with a few exceptions to be sure ;>, but losing friendships along the way just don't seem worth it. And all it takes is a little respect along the way.

~~11~~~~12~~~~13~~ 14 Arrested So Far

A joint investigation by the Hardeman County Sheriff's Department, Special Agents with the Tennessee Bureau of Investigation, Whiteville Police Department, Bolivar Police Department, Federal Bureau of Investigation, and Bureau of Alcohol, Tobacco, Firearms and Explosives has resulted in the arrest of fourteen individuals thus far in connection with an armed robbery spree in Hardeman County, including three in the last week.

"Since April 6, the Hardeman County Sheriff's Department has made fourteen arrests in eight robberies, one homicide and two attempted homicides," said Hard-

eman County Sheriff John Doolen. "I want to thank the Whiteville Police Department, the Tennessee Bureau of Investigations, the FBI, ATF and the Bolivar Police Department for their assistance."

On April 5, 2018, at the request of 25th District Attorney General Mark Davidson, TBI began a joint investigation into the March 20th armed robbery of El Ranchito Restaurant in Bolivar, that resulted in the homicide of 19 year-old Michael Ruiz.

During the course of this investigation, investigators obtained information regarding a nexus to several other armed robberies occurring

Air-Mail the Old Fashioned Way

A disengaged park brake was the cause of a stuck truck at the Bolivar Post Office on May 3. It took some ingenuity and a heavy-duty tow truck to get it all undone.

Photo by Ginger Tester.

Bolivar's Never Ending Story?

The City of Bolivar will meet with state officials in a special session to look for a solution to the Hatchie River Park on Highway 18 North of Bolivar. On April 24, the City Council voted 7-1 to refund the grant to the state, but things aren't that simple, according to Bolivar Mayor Julian McTizic.

"To fulfill the original grant used to purchase the property, it must be a nature center," said McTizic, adding the project is way over budget.

"I met with Gerald Parish of Locals Parks and Recreation Funding and asked him to attend the meeting and tell us the options we have at this point," said Bolivar Mayor Julian McTizic.

Former Bolivar Mayor Barrett Stevens spearheaded the drive to place a park at the site of the former Boat Dock, a bar and grill adjacent to the Hatchie River, signing some of the paperwork two days before he left office in 2017.

The meeting is scheduled for May 21 at 6:00 p.m. at City Hall.

★ SHERIFF ★
JOHN DOOLEN
Paid for by the committee to elect John Doolen, Sheriff, Greg Vaughan, Treasurer

Photo: Hardeman County Sheriff John Doolen and Bolivar Police Chief Pat Baker both attended an anti violence march on May 8, organized by the families related to Michael Ruiz.

Perry Files to Run as Write-In

Tonya Ellison Perry filed the necessary paperwork to run as a certified write-in candidate for the Hardeman County Circuit Court Clerk election in August.

Perry was a candidate in the Hardeman County Democratic Primary, but was second in a three candidate race, losing to current Chief Deputy Sheriff Billy Davis 1,192-959. A third candidate, Butch Gatlin, received 726 votes.

The last candidate for county office to run as a write-in was Delphus Hicks for Sheriff in 2010, who managed 2,122 votes in the general election as a write-in after getting 2,236 in the primary. Hicks, the incumbent, came up 1,153 votes short to democratic nominee John Doolen's total of 3,275 in the August election.

According to Tennessee Law, poll workers cannot even acknowledge the existence of a write-in candidate.

Tickets on Sale at Arts Council

The Hardeman County Arts Council will present their tribute variety show on May 18-20 at the Arts Center. Showtimes are Friday and Saturday at 7:00 p.m. and a matinee on Sunday at 2:00 p.m.

Tickets are \$10 and are on sale to members and will be available to the public on May 12 from 10:00 a.m. to 2:00 p.m.

The box office is open Monday through Friday from 10:00 a.m. to 2:00 p.m. at the Arts Center at 1580 W. Market St. or call 658-2787. All major credit cards are accepted.

OUR COUNTY

Hardeman County Remembered by Lisa Coleman

I never gave birth to anyone but I have had the great blessing to call lots of children "my kids". Having taught Sunday School, Vacation Bible School, library programs, and community programs, I have loved on lots of kids, mostly first graders, who are some of my favorite people on the planet. Ever. This photo of their sweet hands has always been a favorite.

First graders are really starting to use their minds and reasoning and problem solving skills and I love to watch them at work. They are innately curious and want to learn, which I absolutely relate to, as I have always been (and still am) very curious and want to ask lots of questions and learn.

When I taught Sunday School, I would have the children teach the lesson back to me, which is where I learned some powerful things from them:

(-on learning to treat everyone equally) "See, Jesus loved that Samaritan woman just the same as anybody else. He didn't treat her different because she was a girl back when people didn't like girls so much. But he was a gentleman and probably carried the well water for her."

(-on learning to share) "Jesus said we were supposed to share what we had. Even if it is your most favorite candy or the last cookie, you should share because somebody might be sad or might not even have a cookie and you could make them more happy when you share."

(-on learning that Jesus is always with us) "Jesus is like the most, best Dad ever. He always listens to you and never forgets

to come get you. And He never, ever would miss your ball game, because he knows how much you like to play ball. He is even with you when you are sad and sometimes it is ok to be sad. Just tell Him."

(-regarding the Three Wise Men) "Well, the Three Wise Guys, knew they had to kind of trick old King Herod so they could keep Baby Jesus ok. AND, Jesus was cool with it because he knew they were on his side and they were bringing gifts. Pretty weird baby gifts like gold and framacents (frankincense), but maybe that was stuff his Mom, Mary, could use. Girls like stuff like that."

(-on learning to take turns and have manners) "Everybody can't talk all at once and sometimes you have to listen. Like when Jesus and the helpers (the disciples) had that big supper. If they had all talked, it would have been a big mess and nobody could have heard Jesus saying the prayer and nobody would have known when

it was ok to eat. And they were all boys and we can be loud sometimes, but sometimes you have to chill out and listen to Jesus."

I always told my kids at the end of the year that I would always remember them as "my kids", even when they were grown up. Every spring, it seems, I am getting invitations to wedding showers and weddings for my kids; where did the time go? I also told them they always had to remember that Jesus loves them just the way they are and so does Miss Lisa. Forever and always, and Miss Lisa is always going to give them a hug, no matter how big they got.

Y'all I saw one of the boys not long ago; he is now so much taller than me. The first thing he said to me was, "Jesus always loves us and so do you and you are going to hug me, aren't you?" You bet I did. Thanks to all my kids and to their families who let me borrow them for a while; they were excellent teachers for me.

Tales from The Yellow House

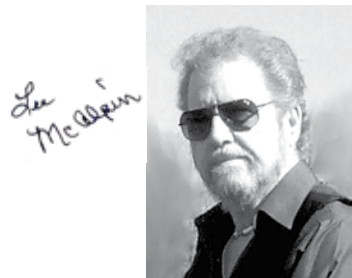

by Lee McAlpin

It has been said time and again that the kitchen is the heart of the home. The same held true at the Yellow House during the fall and winter months. In the summer months, the heat from the wood cook stove placed the temperature equal to that in the cotton fields. A lot of the fixtures that were essential in the early country kitchens have all but disappeared, what with all the welcomed new conveniences for the lady of the house. The old wood cook stove, with it's warming closet, stood statly in our kitchen. The warming closet was a treasure trove of goodies. There were always some baked sweet potatoes, cornbread, and some fluffy cat-head biscuits in there. Our flour barrel, wooden dough bowl and rolling pin was hand carved by our great Grandfather and were used by Mom to produce thousands of her famous biscuits. She didn't use a biscuit cutter. She used the pinch-off and pat-out method. Often, I would get one of the biscuits, punch a hole with my finger nearly all the way through the side of the biscuit, fill the hole with sorghum molasses and chow down. Still good as a Hostess Twinkie.

There was a table that held the water-bucket, dipper, washpan and a towel on a rack nearby. There was a twenty gallon lard stand that held the hog lard rendered out from the last hog killing. Cholesterol or not, it sure made the food taste good. Everything that Mom boiled or fried was seasoned with hog lard. And on a few occasions, when I could not find any Q-Ban hair oil, I shined my curly red hair with some of it. All our food was cooked in black iron cookware. Mom would do her ironing in the kitchen. She did the ironing with a heavy black iron which she heated on the cook stove. She had a little mini shower head imbedded in a cork that she inserted in an RC Cola bottle filled with water that she would dampen the clothes prior to ironing. After heating the smoothing irons, she would rub them across a cedar tree branch. This made the iron glide smoother and also gave the clothes a cedar aroma. Our kitchen also had a stovewood and kindling box in the corner. In one end of the kitchen opposite the cook stove was our dining table. It was my favorite place in the house, as one of my favorite things was, and is, eating. During our meals, us kids were not allowed to cut-up. And for some reason, I have not figured this one out yet, but singing at the dinner table at the Yellow House was near an unpardonable sin. And we were never to make a comment like I hear some kids make these days, such as "I don't like this", or "I wish I had so and so to eat". The one time I did say that, Mom was quick to tell me, "You better be glad you have that to eat, for some poor kids does not have anything". We didn't have to be told to eat everything on our plate, we gladly ate it all.

Who can forget the smell and beauty of a shiny new red and white checkered oil cloth for the dining table. That, plus a mason canning jar full of Moms roses and peonies sitting in the center seem to whet the appetite that much more. The country kitchen was and still is the heart of the home, even into the future when Moms will pre-dial their daily menus into a computer for a pre-cooked five course meal. I wonder why that everytime I write, it wakes my appetite.

BIBLE TRIVIA

by Wilson Casey

1. Is the book of Joppa in the Old or New Testament or neither?
2. What businesswoman from Thyatira opened her home to Paul and saints after her conversion? *Rachel, Keturah, Lydia, Shiprah*
3. Jesus said, "For where your treasure is, there will be your ... also.?" *Love, Heart, Faith, Friends*
4. From 2 Samuel 18, whose hair became tangled in a terebinth tree? *Samson, Herod, Absalom, Joab*
5. On the outskirts of what city did Jesus meet Zacchaeus? *Smyrna, Tarsus, Jericho, Antioch*
6. From 2 Samuel 14, what was the name of Absalom's daughter? *Ruth, Tamar, Miriam, Sarah*

1. Who were the only major-league shortstops to hit 20 homers twice through their age-21 season?
2. Name the last starting pitcher before St. Louis' Carlos Martinez in 2017 to strike out at least 11 hitters and walk at least eight in the same game.
3. In 2016, New Orleans' Drew Brees became one of three players with 30 touchdown passes in nine different seasons. Who else did it?
4. How many times has Xavier's men's basketball team reached the Elite Eight in the NCAA Tournament?
5. In 2018, Carolina's Justin Faulk became the 10th defenseman in NHL history to reach a natural hat trick. Who was the ninth to do it?
6. How many Canadian teams currently play in Major League Soccer, and how many of them were original members of the league?
7. Boxer Joe Louis holds the record for most consecutive successful world heavyweight title defenses. How many?

Trivia test

by Fifi Rodriguez

1. AD SLOGANS: Which company's ads advised consumers to "put a tiger in your tank"?
2. U.S. STATES: Which state designated the American seagull as its official state bird?
3. HISTORY: When was the potato introduced to Europe?
4. OLYMPICS: How long is the balance beam used in women's gymnastics?
5. GEOGRAPHY: What is the capital of Australia?
6. PROVERBS: What is the end to this common proverb: "The early bird ..."?
7. MEASUREMENTS: What does a Geiger counter measure?
8. FAMOUS QUOTES: Which 18th-century statesman and military leader observed, "Glory is fleeting, but obscurity is forever"?
9. ASTRONOMY: Which planet is the closest to Earth?
10. GENERAL KNOWLEDGE: What was the name of the first manufactured breakfast cereal?

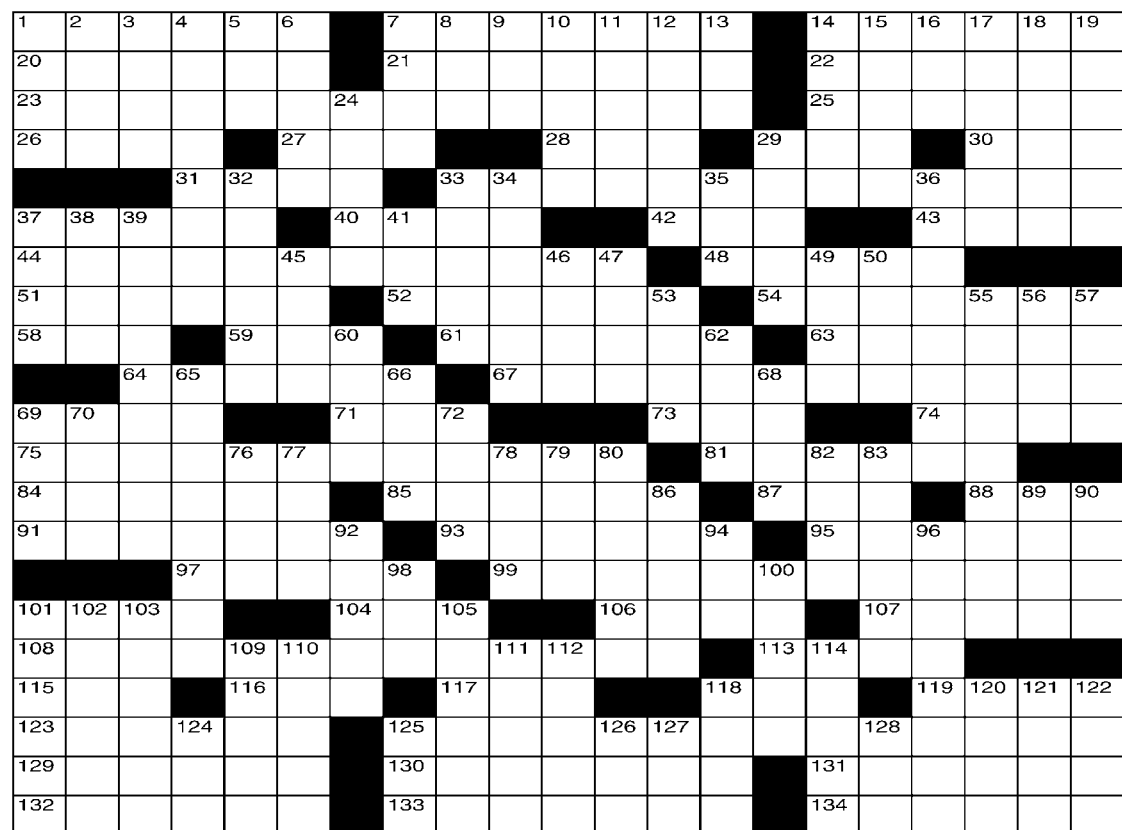

1. What was the name of Bon Jovi's first No. 1 hit single?
2. Who wrote and released "Doctor My Eyes," and when?
3. Which band released "Come Sail Away"? Bonus for knowing the album title.
4. Name the only Kool & the Gang song to reach No. 1 on both the Hot 100 and the R&B charts.
5. Name the song that became Motown's first million-seller, as well as the group.
6. Name the song that contains this brief intro: "Is it rolling, Bob?"

The Maxwell's Stay-at-Home Gourmet

Chicken Teriyaki

- Ingredients**
- 2 skinless chicken breasts
 - 3 teaspoon brown sugar
 - 2 teaspoon oil
 - 1 tablespoon minced ginger
 - 3 tablespoon low sodium soy sauce
 - 1 teaspoon oyster sauce or teriyaki sauce
 - 1/2 cup hot water
 - 1 teaspoon cornstarch dissolved in 2 tablespoons water
 - Sesame seeds for garnish

- Instructions**
- In a bowl, add water, soy sauce, sugar, oyster or teriyaki sauce, and ginger. Mix well.
 - To a hot pan add oil, when hot add the chicken breasts and cook for 2 minutes on each side on high heat.
 - Use a kitchen paper/towel to remove excess oil from the pan.
 - Add the sauce to the chicken and let it simmer for 1 minute, then add the cornstarch mixture and stir quickly, when thick turn off heat.
 - Cut the chicken into slices and serve over rice, sprinkle sesame seeds on top.
 - Serve immediately.

You can buy all the ingredients in this recipe at Maxwell's Big Star, 200 North Main Street, Bolivar

Bolivar Water Department Water Quality Report for 2017

Is my drinking water safe?

Yes, our water meets all of EPA's health standards. We have conducted numerous tests for over 80 contaminants that may be in drinking water. As you'll see in the chart on the back, we only detected six of these contaminants. We found all of these contaminants at safe levels.

What is the source of my water?

Your water, which is ground water, comes from a sand water. Our goal is to protect our water from contaminants and we are working with the State to determine the vulnerability of our water source to **potential** contamination. The Tennessee Department of Environment and Conservation (TDEC) has prepared a Source Water Assessment Program (SWAP) Report for the untreated water sources serving water to this water system. The SWAP Report assesses the susceptibility of untreated water sources to **potential** contamination. To ensure safe drinking water, all public water systems treat and routinely test their water. Water sources have been rated as reasonably susceptible, moderately susceptible or slightly susceptible based on geologic factors and human activities in the vicinity of the water source. The Bolivar Water Department sources rated as reasonably susceptible to potential contamination.

An explanation of Tennessee's Source Water Assessment Program, the Source Water Assessment summaries, susceptibility scorings and the overall TDEC report to EPA can be viewed online at

or you may contact the Water System to obtain copies of specific assessments.

A wellhead protection plan is available for your review by contacting Bobby Hensley at the Bolivar Water Department weekdays.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Este informe contiene información muy importante. Tradúscalo o hable con alguien que lo entienda bien.

For more information about your drinking water, please call Bobby Hensley at 658-2553.

How can I get involved?

Our Water Board meets on the second Tuesday of each month at 5:30 pm at the Bolivar Municipal Center. Please feel free to participate in these meetings.

Is our water system meeting other rules that govern our operations?

The State and EPA require us to test and report on our water on a regular basis to ensure its safety. We have met all of these requirements. Results of unregulated contaminant analysis are available upon request. We want you to know that we pay attention to all the rules.

Other Information

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Water Quality Data

What does this chart mean?

- MCLG** - Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- MCL** - Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.
- MRDL**: Maximum Residual Disinfectant Level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for the control of microbial contaminants.
- MRDLG**: Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- AL** - Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- Below Detection Level (BDL)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected. Non-Detects (ND) - laboratory analysis indicates that the contaminant is not present.
- Parts per million (ppm) or Milligrams per liter (mg/l) – explained as a relation to time and money as one part per million corresponds to one minute in two years or a single penny in \$10,000.
- Parts per billion (ppb) or Micrograms per liter - explained as a relation to time and money as one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- Million Fibers per Liter (MFL) - million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.
- TT** - Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.
- AVG** – Average
- RTCR** – Revised Total Coliform Rule. This rule went into effect on April 1, 2016 and replaces the MCL for total coliform with a Treatment Technique Trigger for a system assessment.

Contaminant	Violation Yes/No	Level Found	Range of Detections	Date of Sample	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Total Coliform Bacteria (RTCR)	No	0		2017		0	TT Trigger	Naturally present in the environment
Copper ¹	No	0.00607 90 th Percent		2017	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Fluoride	No	0.448 AVG	0.38-0.63	2017	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Lead ¹	No	1.36 90 th Percent		2017	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Sodium	No	9.82		2017	ppm	N/A	N/A	Erosion of natural deposits; used in water treatment
TTHM [Total trihalomethanes]	No	7.76		2017	ppb	n/a	80	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	No	<2		2017	ppb	N/A	60	By-product of drinking water disinfection.
Chlorine	No	AVG 1.46	1.0-21	2017	ppm	MRDLG 4	MRDL 4	Water additive used to control microbes.

Iron: Iron occurs naturally in our raw water and occasionally accumulates in the distribution system. Iron shows up as "red" or "rusty" water at your tap. Although you do not want to drink water that is not clear, iron is not considered to be a hazard to your health. We test for iron daily and it is usually around 0.1 ppm. The aesthetic limit for iron is 0.3 ppm.

¹During the most recent round of Lead and Copper testing, only 0 out of 20 households sampled contained concentrations exceeding the action level.

- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and the Tennessee Department of Environment and Conservation prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Do I Need To Take Special Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have under-gone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about not only their drinking water, but food preparation, personal hygiene, and precautions in handling infants and pets from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Lead in Drinking Water

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Bolivar Water Department is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at

Water System Security

Following the events of September 2001, we realize that our customers are concerned about the security of their drinking water. We urge the public to report any suspicious activities at any utility facilities, including treatment plants, tanks, fire hydrants, etc. to 658-2553 or 658-5894.

Think before you flush!

Flushing unused or expired medicines can be harmful to your drinking water. Properly disposing of unused or expired medication helps protect you and the environment. Keep medications out of Tennessee's waterways by disposing in one of our permanent pharmaceutical take back bins. There are nearly 100 take back bins located across the state, to find a convenient location please visit:

NATURAL GAS CUSTOMERS PILOTS LIGHTS TURN OFF

Service for turning off pilots lights for FREE will begin May 18 and run through June 16, customers must call two to three days in advance at 731-658-5894. Requests will be worked as time permits. After this period, there will be a \$25.00 charge for this service.

Emergency calls will be handled as usual.

Bolivar Utility Department

Fourteen Arrested So Far

in Hardeman County during the time period of December 9, 2017 through March 30, 2018.

To date, as a result of this ongoing investigation, fourteen individuals including seven adults and seven juveniles have been arrested in connection with the following armed robberies:

December 9, 2017: Ready Mart, 670 N. Main Street Bolivar.

December 11, 2017: Big Lakes Grocery 433 E. Market Street Bolivar.

January 15, 2018: Dollar Tree, 1361 W. Market Street Bolivar.

February 24, 2018: Larry's Quick Stop 1835 Highway 64 Whiteville.

February 27, 2018: Dollar General 13465 Highway 100 Toone.

March 20, 2018: El Ranchito,

continued from A1

1363 W. Market Street Bolivar.

March 30, 2018: Dollar General, 22995 Highway 64 Hornsby.

Excluding the seven juveniles, all individuals arrested with their respective charges and bond amounts are listed below:

Taylor Lucas Robinson (DOB 1/15/2000, Bolivar, Bond: None): Aggravated Robbery (x3), Possession of Firearm Attempting to Commit a Dangerous Felony (x3), First Degree Murder, Attempted First Degree Murder (x2).

John Gray (DOB 5/30/1998, Bolivar, Bond: None): Especially Aggravated Robbery, Possession of Firearm. Attempting to Commit a Dangerous Felony, First Degree Murder.

Jamarcus Dequan Murdock (DOB 4/14/1999, Bolivar, Bond: \$400,000): Aggravated Robbery (x2), Possession of Firearm Attempting to Commit a Dangerous Felony.

Tacyvin Demetriez Douglas (DOB 3/15/2000, Bolivar, Bond: \$20,000): Aggravated Robbery.

Brenterrius Eesean Holmes (DOB 2/7/2000, Whiteville, Bond: \$150,000): Aggravated Assault.

Benjamin Turner (DOB 1/18/2000, Bolivar, Bond: None): Aggravated Assault (x2), Attempted First Degree Murder, Possession of Firearm Attempting to Commit a Dangerous Felony.

Jaquan Blakemore (DOB 9/15/1999, Bolivar, Bond: None): Aggravated Robbery, Attempted First Degree Murder.

THANK YOU to the people of Hardeman County for your support in the primary election.

My family and I have worked very hard and dedicated countless hours campaigning all over our county. The encouragement and support we have received has been a very humbling experience and I sincerely thank you for allowing me so great a privilege. I would also like to say Thank you to Mr. Dale Dixon for running a good clean positive campaign. He is a great man with a wonderful family and I wish nothing but the best for him and his family.

As we move forward to the General Election in August, I want to ask you for your continued support and vote. Thank you again!! Now let's win in August!! With your vote and support we can make a difference.

Casey Swift

Toone Water System Water Quality Report for 2017

Is my drinking water safe?

Yes, our water meets all of EPA's health standards. We have conducted numerous tests for over 80 contaminants that may be in drinking water. As you'll see in the chart on the back, we only detected four of these contaminants. We found all of these contaminants at safe levels.

What is the source of my water?

Your water, which is ground water, comes from the Memphis Sand Aquifer. Our goal is to protect our water from contaminants and we are working with the State to determine the vulnerability of our water source to **potential** contamination. The Tennessee Department of Environment and Conservation (TDEC) has prepared a Source Water Assessment Program (SWAP) Report for the untreated water sources serving water to this water system. The SWAP Report assesses the susceptibility of untreated water sources to **potential** contamination. To ensure safe drinking water, all public water systems treat and routinely test their water. Water sources have been rated as reasonably susceptible, moderately susceptible or slightly susceptible based on geologic factors and human activities in the vicinity of the water source. The Toone Water System sources rated as moderately susceptible to potential contamination.

An explanation of Tennessee's Source Water Assessment Program, the Source Water Assessment summaries, susceptibility scorings and the overall TDEC report to EPA can be viewed online at

or you may contact the Water System to obtain copies of specific assessments.

A wellhead protection plan is available for your review by contacting Mayor Joe Jones at the Toone Water System.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Este informe contiene información muy importante. Tradúscalo o hable con alguien que lo entienda bien.

For more information about your drinking water, please call Mayor Joe Jones at 658-9770.

How can I get involved?

Our Water Board meets on the second Tuesday of each month at 7:20 pm at the City Hall. Please feel free to participate in these meetings.

Is our water system meeting other rules that govern our operations?

The State and EPA require us to test and report on our water on a regular basis to ensure its safety. We have met all of these requirements. Results of unregulated contaminant analysis are available upon request. We want you to know that we pay attention to all the rules.

Other Information

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and the Tennessee Department of Environment and Conservation prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Do I Need To Take Special Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have under-gone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about not only their drinking water, but food preparation, personal hygiene, and precautions in handling infants and pets from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Lead in Drinking Water

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Toone Water System is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at

Water System Security

Following the events of September 2001, we realize that our customers are concerned about the security of their drinking water. We urge the public to report any suspicious activities at any utility facilities, including treatment plants, tanks, fire hydrants, etc. to 658-9770.

Think before you flush!

Flushing unused or expired medicines can be harmful to your drinking water. Properly disposing of unused or expired medication helps protect you and the environment. Keep medications out of Tennessee's waterways by disposing in one of our permanent pharmaceutical take back bins. There are nearly 100 take back bins located across the state, to find a convenient location please visit:

Water Quality Data

What does this chart mean?

- MCLG** - Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- MCL** - Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.
- MRDL**: Maximum Residual Disinfectant Level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for the control of microbial contaminants.
- MRDLG**: Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- AL** - Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- Below Detection Level (BDL)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected.
- Non Detection (ND)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected.
- Parts per million (ppm) or Milligrams per liter (mg/l)** – explained as a relation to time and money as one part per million corresponds to one minute in two years or a single penny in \$10,000.
- Parts per billion (ppb) or Micrograms per liter** - explained as a relation to time and money as one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- TT** - Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.
- AVG** – Average
- RTCR** – Revised Total Coliform Rule. This rule went into effect on April 1, 2016 and replaces the MCL for total coliform with a Treatment Technique Trigger for a system assessment.

Contaminant	Violation Yes/No	Level Found	Range of Detections	Date of Sample	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Total Coliform Bacteria (RTCR)	No	0		2017		0	TT Trigger	Naturally present in the environment
Copper ¹	No	90 th % = 0.0528		2015	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead ¹	No	90 th % = 0.5		2015	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
TTHM [Total trihalomethanes]	No	ND		2017	ppb	n/a	80	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	No	<2		2017	ppb	N/A	60	By-product of drinking water disinfection.
Sodium	No	14.1		2017	ppm	N/A	N/A	Erosion of natural deposits; used in water treatment
Chlorine	No	AVG 1.45	1.4-1.5	2017	ppm	MRDLG 4	MRDL 4	Water additive used to control microbes.

Iron: Iron occurs naturally in our raw water and occasionally accumulates in the distribution system. Iron shows up as "red" or "rusty" water at your tap. Although you do not want to drink water that is not clear, iron is not considered to be a hazard to your health. The aesthetic limit for iron is 0.3 ppm.

¹During the most recent round of Lead and Copper testing, 0 out of 10 households sampled contained concentrations exceeding the action level.

COMMUNITY NEWS

Toone

Glenn Yarbrough
731-609-0939
gnyarb@bellsouth.net

Hello from Toone, where big plans are underway for an historic event for our little town, a visit from our governor! Yes, Governor Bill Haslam, will be the honored guest and key-note speaker at the ground-breaking ceremony to celebrate Kilgore Flare Co. factory's newest expansion and renovations. This event will take place in the parking lot of Kilgore, Tuesday, May 15, at 10:00 a.m. This expansion is the first phase of a major multi-million dollar re-investment program in the Toone plant. When the project is completed, it will add many new jobs for Toone and Hardeman County.

Joining the Governor will be Toone Mayor, Joe Jones, and many other local and county officials and business leaders. We are certainly honored that Governor Haslam chose to attend this event and visit our Town. More details will follow.

After more than a year of hard work and diligent effort completing mountains of paperwork and navigating miles of state and local red-tape, as of April 27, the annexation of the property along Highway 100 around the Toone Dollar General store is complete, and the property has finally become part of the Toone City limits. This will be a great opportunity because the town can now receive their share of the sales tax collected by the store. Our thanks go out to Mayor Jones, County Mayor Jimmy Sain, the County Commission, along with numerous other local and state personnel who all worked together to make this happen.

This week has been Teacher Appreciation Week at Toone School. This is the week that the TES PTO sets aside to recognize our wonderful teachers and school staff and to say thank you for their hard work by treating them to special gifts during the week and to help furnish much-needed supplies for their classrooms. Please join the PTO in thanking our teachers on a job well done!

Decoration Day at, Rainey Cemetery, on Naylor Road in Toone, will be Sunday, May 13, 2018. There will be a tent set up, Saturday, May 12, at the cemetery, where members of the cemetery committee will be stationed to accept contributions and update their address list of family members and friends who have loved ones buried there. This list will help the committee notify family members of future changes and improvements made at the cemetery. If you are unable to come by, contributions can be sent to: Rainey Cemetery Fund, c/o Keith Foote, Treasurer, 2220 Hwy 138, Toone, TN. 38381.

Work continues in the new intersection at Highway 100 and 138. There is a lot of heavy equipment being moved around and many big trucks entering the highway, so please slow down and be extra observant when driving through that area. As the old saying goes, "the life you save may be your own!"

I know many of you have children or grandchildren and other family members graduating from various schools and colleges this month, so brag on them right here for all of your neighbors to see by contacting me via the phone number or email address listed above!

Until next time. . . talk to your neighbors!

...

Silerton

Mary Lynn Lambert
609-6455

Silerton residents are invited to join the city council meeting on Tuesday, May 15, at 5:30 p.m. at the city park.

Reminder: Residents are responsible for keeping their driveway culvert cleaned out.

On Saturday afternoon ladies gathered at the Baptist Church for a fun-fest. Special guests were Gwen Lindley and her daughter, Robbie from Amelia, OH. Attendees were asked to bring a baby picture. Judy Fisher was the winner putting the baby picture with the correct lady. She successfully put five together. Each attendee was also asked to bring items to swap. Over 200 items were brought. The ladies had an exciting time swapping their items. After all the fun and laughing, they enjoyed desserts.

Willard Beshires announces that the city is collecting memorabilia for the Silerton Museum in the City Hall. The city has acquired some display cases and now request residents to find historical items to be displayed. If you have any items to contribute such as coins or tokens from the old store, old photographs or trophies, or any other items you feel would be of interest, please contact Willard at 731-608-1347.

Piney Grove Baptist Church enjoyed great fellowship and worship, beautiful weather, and an abundance of food during their annual weekend retreat at Chickasaw. The church has enjoyed this retreat for over 25 years. The weekend began with check in at 3:00 at the group lodge on Friday afternoon. Everyone enjoyed a very competitive team version of Bible Trivia, late night conversations, music, and eating until the last person gave in and retired for a few hours of sleep. A huge breakfast was cooked on sight and then a bountiful meal for Saturday night. Bro. Cody Lamberth was the Saturday night speaker. He brought a very inspirational message. Sunday morning began with Pastor, David Howell, bringing a timely message at the Cowboy Church service at the Chickasaw stable area. This was part of the St Jude Rodeo Fundraiser weekend activities. Then at 11:00, Bro. David brought a message to the church group at the lodge. Lunch consisted of hamburgers and hotdogs. The weekend was filled with volleyball, Sunday afternoon softball, Bro. David's much anticipated "truck" trail rides, a lot of kitchen duty and then the work of packing up, all the time looking forward to next year. Wanda Young, one of the organizers, said that the most important thing was the quality time spent together with God and His people. She said, "Bro. David's message reminded us of all God's blessings and goodness, encouraging us to worship and serve Him by bringing others into our fellowship and His kingdom. Everyone agreed we are truly a blessed people."

Frankie, Larry and Barbara Lambert traveled to Washington, IL to attend the funeral of Lance Wade. Lance is the son of Hughlon and Ann (Lambert) Wade, and grandson of the late Mr. and Mrs. Clay Lambert. Lance, age 54, fought a short battle with an aggressive cancer.

I encourage all readers to call and share stories and special memories of people who are associated with Silerton. Let's stay connected.

Hornsby

Amber D. Moore
731-609-1210
amber.moore_04@yahoo.com

Hello to all from Hornsby! Well the weather sure has been beautiful and I hope we continue to see it for a while. I know people who work outside are thankful to be seeing the sunshine. Those celebrating birthdays the 16th through the 31st are: Candice Roberts Kadea Bolyard, Karsyn Pipkins, Fury Tosh, Kenslee Pipkins, Kaitlyn Goodman, & Lani Frey. We would like to wish you a very Happy Birthday on your special day.

Please mark your calendar that the Pre-K Graduation program is at 8:30 a.m. on the 17th and will be followed by the Kindergarten Graduation at 10:00 a.m. that same day. Awards day and 8th grade graduation will be on the 18th at 8:30 a.m. Hornsby Baptist Church honored the graduates Sunday by presenting bibles to each of them. Congratulations to all those from Kindergarten, 8th grade, high school seniors and college graduates on your accomplishments. The church will have a meal after the morning service, everyone is invited to stay and enjoy the fellowship.

If you have any stories you would like to share about the history of the community please contact me, I would love to share them. I know our prayer list is long but please lift these people up I know there are more out there. Please remember to pray for the following: Sydni Aylor, Patricia Baker, Terry Baker, Max Beck, Melanie Bowers, Jon Boyette, Eddie Bryant, Amanda Cornelius, Kenneth Crawford, Sue Day, Elynor DeBerry, Jason Dixon, Bobbie Dorris, Rich Emerson, Shirley Emerson, Esther Galigher, Brenda Grantham, Sue Hall, James Hanna, Kristian Harris, Richard Hazelwood, Bobby Hodge, Sue Hodge, Dewey Hopkins, Jo Edna Howell, Wade Howell, Charley Johnson, Ann Kelly, Aubrey King, Roger King, Debbie Laster, Shirley Lindsey, Nickie Lyles, Nell Maddox, Bobbie McBride, David Harris McKinnie, Betty McMahan, Orville McMahan, Margie Moore, Evan Nield, Lockie Newman, Joyce Overton, Timmy Parchman, Gay Pierce, Eloise Poole, Gail Pope, Paula Prince, Lisa Pulse, Keith Raines, Stacy Spence, Ronna Spoon, Susan Thompson, Gary Valter, Bertha Vaughn, Martyn Venuti, Lawanda Vickers, Josh Walton, Eddie Webb, Jennifer Wheeler, Piper Williams, Monica Yopp, the men and women who serve our country, and the families of the ones who are fighting cancer.

His word for the week: Psalms 28:7 "The Lord is my strength and my shield; my heart trusted in Him and I am helped: therefore my heart greatly rejoiced; and with my song will I praise Him." Praise God!!

OPINION

The Editor's Inbox...Letters to the Editor

I strongly support the Agriculture and Nutrition Act of 2018 that was approved by the House Agriculture Committee, and urge the House of Representatives to pass this bill without any damaging amendments to farm policy.

Short-term extensions or lapses in farm policy would be disruptive and damaging to me as a producer and to the businesses in our rural community that support our agriculture production, processing, and marketing sectors.

The Agriculture and Nutrition Act of 2018 includes critically important policies for cotton producers and the entire U.S. cotton industry. A strong farm bill helps support a healthy and thriving rural economy that includes cotton gins, warehouses, marketing coops and merchants to market the crop, cottonseed handlers, and textile manufacturers.

As a farmer, I rely on the certainty and predictability of a farm bill to obtain the financing necessary for capital investments and annual crop production. Without strong commodity and crop insurance policies underpinning U.S. agriculture, lenders would be reluctant to provide financing to an industry operating at the mercy of weather extremes and volatile global market prices, and in competition with heavily subsidized and protected foreign producers.

The current trade tensions further underscore the importance of having a strong, predictable farm policy. Cotton is a heavily export dependent crop with nearly all our production exported in some form – from raw cotton to textile products. This farm bill continues important policies to help U.S. producers compete in a highly competitive global marketplace.

Andy Shelton
Cotton Producer
Bolivar, Tennessee

Thank You!

Thank you to the supporters and voters in electing me as the Democratic Nominee for Circuit Court Clerk of Hardeman County. We will continue to run a clean and positive campaign, and I am asking for your continued support and vote as we move forward to the General Election in August.

Thank You Again,
GOD BLESS
Billy Davis

ON BOARD:::::

I've seen this several times on Facebook, where the lucky TURKEY HUNTER:::: GOT ON BOARD with his/ her first bird of the season. I can finally say after hunting for seven days: I'm finally "ON BOARD"!! The 6th day, I actually heard a turkey gobble. It was an ABSOLUTE fly down from roost, shoot, try my best to gather my senses hunt I've had in decades!! If I could only BOTTLE that feeling I got when he gobbled after I belly-crawled to a BlackBerry thicket with out Busting him!!

Let me explain::: I got to my listening spot well before daybreak, even caught myself swatting SKEETERS. I was in the edge of a field with fingers crossed I'd here one. When he gobbled, he was two trees deep about 40 yards!! I instantly fell to the ground and crawled. He gobbled, I tree yelped, he pitched out, landed about 60 yards, I called, he gobbled and was closing the distance. THE SECOND GOBBLER PITCHED OUT AND LITE IN FRONT OF MY GUN BARREL. I SHOT, HE FLOPPED!! Of course "that" only happens once and a GREAT Moon with me!! THERE IS. A SANTA CLAUS!! ALWAYS REMEMBER:: SAFETY FIRST:: HOOT

Note: Yes, a turkey rode in the red truck.

Grand Junction Water System Water Quality Report for 2017

Is my drinking water safe?

Yes, our water meets all of EPA's health standards. We have conducted numerous tests for over 80 contaminants that may be in drinking water. As you'll see in the chart on the back, we only detected seven of these contaminants. We found all of these contaminants at safe levels.

What is the source of my water?

Your water, which is ground water, comes from a sand. Our goal is to protect our water from contaminants and we are working with the State to determine the vulnerability of our water source to **potential** contamination. The Tennessee Department of Environment and Conservation (TDEC) has prepared a Source Water Assessment Program (SWAP) Report for the untreated water sources serving water to this water system. The SWAP Report assesses the susceptibility of untreated water sources to **potential** contamination. To ensure safe drinking water, all public water systems treat and routinely test their water. Water sources have been rated as reasonably susceptible, moderately susceptible or slightly susceptible based on geologic factors and human activities in the vicinity of the water source. The Grand Junction Water System sources rated as reasonably susceptible to potential contamination.

An explanation of Tennessee's Source Water Assessment Program, the Source Water Assessment summaries, susceptibility scorings and the overall TDEC report to EPA can be viewed online at

or you may contact the Water System to obtain copies of specific assessments.

A wellhead protection plan is available for your review by contacting Bobby Hensley at the Grand Junction Water System between 7:30 AM to 4:00 PM weekdays.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Este informe contiene información muy importante. Tradúscalo o hable con alguien que lo entienda bien.

For more information about your drinking water, please call Bobby Hensley at 731-764-2871.

How can I get involved?

Our Water Board meets on the first Monday of each month at 7:00 PM at City Hall, which is located at 150 Tippah Street. Please feel free to participate in these meetings.

Is our water system meeting other rules that govern our operations?

The State and EPA require us to test and report on our water on a regular basis to ensure its safety. We have met all of these requirements. Results of unregulated contaminant analysis are available upon request. We want you to know that we pay attention to all the rules.

Other Information

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and the Tennessee Department of Environment and Conservation prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Do I Need To Take Special Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have under-gone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about not only their drinking water, but food preparation, personal hygiene, and precautions in handling infants and pets from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Lead in Drinking Water

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Grand Junction Water System is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at

Water System Security

Following the events of September 2001, we realize that our customers are concerned about the security of their drinking water. We urge the public to report any suspicious activities at any utility facilities, including treatment plants, tanks, fire hydrants, etc. to 896-9022.

Think before you flush!

Flushing unused or expired medicines can be harmful to your drinking water. Properly disposing of unused or expired medication helps protect you and the environment. Keep medications out of Tennessee's waterways by disposing in one of our permanent pharmaceutical take back bins. There are nearly 100 take back bins located across the state, to find a convenient location please visit:

Water Quality Data

What does this chart mean?

- **MCLG** - Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **MCL** - Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.
- **MRDL**: Maximum Residual Disinfectant Level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for the control of microbial contaminants.
- **MRDLG**: Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- **AL** - Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- **Below Detection Level (BDL)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected.
- **Non-Detects (ND)** - laboratory analysis indicates that the contaminant is not present.
- **Parts per million (ppm) or Milligrams per liter (mg/l)** - explained as a relation to time and money as one part per million corresponds to one minute in two years or a single penny in \$10,000.
- **Parts per billion (ppb) or Micrograms per liter** - explained as a relation to time and money as one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- **Million Fibers per Liter (MFL)** - million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.
- **RTCR** - Revised Total Coliform Rule. This rule went into effect on April 1, 2016 and replaces the MCL for total coliform with a Treatment Technique Trigger for a system assessment.
- **TT** - Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.

Contaminant	Violation Yes/No	Level Found	Range of Detections	Date of Sample	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Total Coliform Bacteria (RTCR)	No	0		2017		0	TT Trigger	Naturally present in the environment
Combined radium	No	1.58		2014	PCi/l	0	5	Erosion of natural deposits
Copper ¹	No	90 th % = 0.00415		2015	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead ¹	No	90 th % = 3.09		2015	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Nitrate (as Nitrogen)	No	1.45		2017	ppm	10	10	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Sodium	No	7.41		2017	ppm	N/A	N/A	Erosion of natural deposits; used in water treatment
TTHM [Total trihalomethanes]	No	2.01		2017	ppb	n/a	80	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	No	<2.0		2017	ppb	N/A	60	By-product of drinking water disinfection.
Chlorine	No	1.1 AVG	0.9-1.3	2017	ppm	MRDLG 4	MRDL 4	Water additive used to control microbes.

Iron: Iron occurs naturally in our raw water and occasionally accumulates in the distribution system. Iron shows up as "red" or "rusty" water at your tap. Although you do not want to drink water that is not clear, iron is not considered to be a hazard to your health. We test for iron daily and it is usually around 0 ppm. The aesthetic limit for iron is 0.3 ppm.

¹During the most recent round of Lead and Copper testing, 0 out of 10 households sampled contained concentrations exceeding the action level.

NOTICE OF TRUSTEE'S SALE

WHEREAS, default has occurred in the performance of the covenants, terms, and conditions of a Deed of Trust Note dated January 8, 2009, and the Deed of Trust of even date securing the same, recorded January 22, 2009, in Book No. 675, at Page 268, in Office of the Register of Deeds for Hardeman County, Tennessee, executed by Kevin Bishop, conveying certain property therein described to Ronald M. Harkavy as Trustee for Mortgage Electronic Registration Systems, Inc., as nominee for Realty Mortgage Corporation, its successors and assigns; and the undersigned, Wilson & Associates, P.L.L.C., having been appointed Successor Trustee by PennyMac Loan Services, LLC.

NOW, THEREFORE, notice is hereby given that the entire indebtedness has been declared due and payable; and that an agent of Wilson & Associates, P.L.L.C., as Successor Trustee, by virtue of the power, duty, and authority vested in and imposed upon said Successor Trustee, by PennyMac Loan Services, LLC, will, on June 4, 2018 on or about 10:00 AM, at the Hardeman County Courthouse, Bolivar, Tennessee, offer for sale certain property hereinafter described to the highest bidder FOR certified funds paid at the conclusion of the sale, or credit bid from a bank or other lending entity pre-approved by the successor trustee. The sale is free from all exemptions, which are expressly waived in the Deed of Trust, said property being real estate situated in Hardeman County, Tennessee, and being more particularly described as follows:

Beginning at a stake 139 feet south of the northeast corner of the property purchased by Cooper from Richardson (Deed F-5, Page 1), the northeast corner of this lot, the southeast corner of Lot No. 9, runs thence south 100 feet to a stake, in W.B.L. of Cartwright; thence south 89 degrees 30' west 155 feet to a stake in the east margin of a newly proposed street which is 40 feet wide; thence north with the east margin of said street 100 feet to an iron stake; thence north 89 degrees 30' east 155 feet to the point of beginning. ALSO KNOWN AS: 328 Cooper Cove, Whiteville, TN 38075-4847

This sale is subject to all matters shown on any applicable recorded plat; any unpaid taxes; any restrictive covenants, easements, or setback lines that may be applicable; any statutory rights of redemption of any governmental agency, state or federal; any prior liens or encumbrances as well as any priority created by a fixture filing; and to any matter that an accurate survey of the premises might disclose. In addition, the following parties may claim an interest in the above-referenced property:

KEVIN BISHOP CAVALRY SPV 1, LLC AS ASSIGNEE OF GE RETAIL BANK/LOWE'S CONSUMER KEVMAR CAPITAL CORPORATION

The sale held pursuant to this Notice may be rescinded at the Successor Trustee's option at any time. The right is reserved to adjourn the day of the sale to another day, time, and place certain

without further publication, upon announcement at the time and place for the sale set forth above. In the event of inclement weather, the trustee hereby announces that the sale will be postponed for a period of two weeks. In such situations, notices will be mailed to interested parties of record. W&A No. 304860 DATED May 2, 2018 WILSON & ASSOCIATES, P.L.L.C., Successor Trustee

SUBSTITUTE TRUSTEE'S SALE Sale at public auction will be on May 24, 2018 at 10:00 a.m., local time, at the West Door of the Hardeman County Courthouse, 100 North Main Street, Bolivar, TN 38008, pursuant to Deed of Trust executed by Ricky Ellington, a married person, to Hunter Simmons, as Trustee for First South Bank, dated March 5, 2012, of record in Book 700, Page 447, in the Register's Office for Hardeman County, Tennessee ("Deed of Trust"), conducted by Padgett Law Group, having been appointed Substitute Trustee, all of record in the Hardeman County Register's Office. Default in the performance of the covenants, terms, and conditions of said Deed of Trust has been made; and the entire indebtedness has been declared due and payable.

Party entitled to enforce the debt: Simmons Bank successor by merger with First South Bank

Other interested parties: Ford Motor Credit Company LLC and Discover Bank

The hereinafter described real property located in Hardeman County will be sold to the highest call bidder subject to all unpaid taxes, prior liens and encumbrances of record.

Legal Description: Beginning at a bottle on south margin of said Peavine Road and on the northeast corner of the land held by said L.R. Talley, a northwest corner of Dennie D. Harris and runs South only 9 poles to an iron stake, a southeast corner of this conveyance, a post oak pointer; thence West 8.44 poles to a bottle near the trunk of a post oak pointer and one gum pointer, a southwest corner of the one acre; thence North 25 1/2 degrees West 19.72 poles to a stake in fence on

the south margin of said Peavine Road; thence with the south margin of said road approximately 20 poles to the point of beginning, containing 1 acre, more or less. (All bearings M.A. 3 degrees, 1963).

Street Address: The street address of the property is believed to be 7840 Pea Vine Road, Middleton, TN 38052 but such address is not part of the legal description of the property. In the event of any discrepancy, the legal description herein shall control. Map/Parcel Number: 153 00800 000153

Current owner(s) of Property: Ricky Ellington

This sale is subject to all matters shown on any applicable recorded Plat or Plan; any unpaid taxes and assessments; any restrictive covenants, easements or setback lines that may be applicable; rights of redemption, equity, statutory or otherwise, not otherwise waived in the Deed of Trust, including rights of redemption of any governmental agency, state or federal; and any and all prior deeds of trust, liens, dues, assessments, encumbrances, defects, adverse claims and other matters that may take priority over the Deed of Trust upon which this foreclosure sale is conducted or are not extinguished by this Foreclosure Sale.

THE PROPERTY IS SOLD WITHOUT ANY REPRESENTATIONS OR WARRANTIES, EXPRESSED OR IMPLIED, RELATING TO TITLE, MARKETABILITY OF TITLE, POSSESSION, QUIET ENJOYMENT OR THE LIKE AND FITNESS FOR A GENERAL OR PARTICULAR USE OR PURPOSE. The title is believed to be good, but the undersigned will sell and convey only as Substitute Trustee.

The right is reserved to adjourn the sale to another time certain or to another day, time, and place certain, without further publication upon announcement on the day, time, and place of sale set forth above or any subsequent adjourned day, time, and place of sale.

If you purchase a property at the foreclosure sale, the entire purchase price is due and payable at the conclusion of the auction in the form of

a certified check made payable to or endorsed to Padgett Law Group. No personal checks will be accepted. To this end, you must bring sufficient funds to outbid the lender and any other bidders. Insufficient funds will not be accepted. Amounts received, in excess of the winning bid will be refunded to the successful purchaser at the time the foreclosure deed is delivered.

This property is being sold with the express reservation that the sale is subject to confirmation by the lender or trustee. This sale may be

rescinded by the Substitute Trustee at any time.

THIS IS AN ATTEMPT TO COLLECT A DEBT, AND ANY INFORMATION OBTAINED WILL BE USED FOR THAT PURPOSE.

Padgett Law Group, Substitute Trustee

Notice of Special Called Meeting of the Bolivar City Council

Notice is hereby given that the Mayor and the City Council of the City of Bolivar will meet in special called session Monday, May 21, 2018 at 6:00 p.m. at the Bolivar Municipal Center, 211 N. Washington St., Bolivar, Tennessee. The purpose of this meeting is to discuss the Local Parks and Recreation Fund grant (LPRF) for the Hatchie River Park and Nature Center. The public is invited and welcome to attend.

IN THE CHANCERY COURT OF HARDEMAN COUNTY, TENNESSEE FOR THE 25th JUDICIAL DISTRICT AT BOLIVAR

LANEASHA DONSHEA DURHAM, PLAINTIFF, VS. ANTHONY DESHAZOR, DEFENDANT. CIVIL ACTION NO: 18904

ORDER OF PUBLICATION (NON-RESIDENT NOTICE)

It appearing from the complaint in this cause, which is sworn to, that Anthony Deshazor cannot be personally served with process, it is ordered that publication be made for four (4) consecutive weeks in The Bulletin Times, a newspaper published at Bolivar, in Hardeman County, Tennessee, requiring the said Defendant to defend a civil action, which seeks a Complaint For Divorce by filing your answer with the Clerk of the Court, and serving a copy of the answer to the Complaint on: Laneasha Donshea Durham, Pro Se, whose address is: 210 East Jackson St., Bolivar, TN, 38008.

Within THIRTY (30) DAYS after the date of the last publication of this notice, not including day of last publication. If you fail to do so, a judgment by default may be taken against you for the relief demanded in the Complaint.

This the 3rd day of May, 2018.

JANICE M. BODIFORD, CLERK & MASTER PO BOX 45, BOLIVAR, TN 38008

LANAEASHA DONSHEA DURHAM PRO SE

IN THE CHANCERY COURT OF HARDEMAN COUNTY, TENNESSEE NOTICE TO CREDITORS

PROBATE NO. P-2143

ESTATE OF HUGHES DANIEL RAINEY late of Hardeman County, Tennessee

Notice is Hereby Given that on the 26th day of April, 2018, Letters of Administration, c.t.a. in respect of the Estate of Hughes Daniel Rainey, deceased, who died March 5, 2018, were issued to the undersigned by the Chancery Court Clerk of Hardeman County, Tennessee. All persons, resident and non-resident, having claims, matured or unmatured, against the Estate are required by law to file the same with the Clerk of the above named Court on or before the earlier of the dates prescribed in (1) or (2) otherwise their claims will be forever barred:

- (1) Four (4) months from the date of the first publication (or posting, as the case may be) of this notice if the creditor received an actual copy of this Notice to Creditors at least sixty (60) days before date that is four (4) months from the date of the first publication (or posting); or (B) Sixty (60) days from the date the creditor received an actual copy of the Notice to Creditors, if the creditor received the copy of the Notice less than sixty (60) days prior to the date that is four (4) months from the date of the first publication (or posting) as described in (1) (A); or (2) Twelve (12) months from the decedent's date of death.

All persons indebted to the above Estate must come forward and make proper settlement with the undersigned at once. This 26th day of April, 2018.

THIS NOTICE WILL RUN TWO CONSECUTIVE WEEKS

FILE CLAIMS IN TRIPLICATE WITH:

JANICE M. BODIFORD, CLERK & MASTER P.O. BOX 45 BOLIVAR, TN 38008

TANAYIA GIVHAN PRO SE

Hornsby Water System Water Quality Report for 2017

Is my drinking water safe?

Yes, our water meets all of EPA's health standards. We have conducted numerous tests for over 80 contaminants that may be in drinking water. As you'll see in the chart on the back, we only detected five of these contaminants. We found all of these contaminants at safe levels.

What is the source of my water?

Your water, which is ground water, comes from Selmer Utility Division, whose water comes from a sand aquifer. Our goal is to protect our water from contaminants and we are working with the State to determine the vulnerability of our water source to **potential** contamination. The Tennessee Department of Environment and Conservation (TDEC) has prepared a Source Water Assessment Program (SWAP) Report for the untreated water sources serving water to this water system. The SWAP Report assesses the susceptibility of untreated water sources to **potential** contamination. To ensure safe drinking water, all public water systems treat and routinely test their water. Water sources have been rated as reasonably susceptible, moderately susceptible or slightly susceptible based on geologic factors and human activities in the vicinity of the water source. The Hornsby Water System sources rated as reasonably susceptible to potential contamination.

An explanation of Tennessee's Source Water Assessment Program, the Source Water Assessment summaries, susceptibility scorings and the overall TDEC report to EPA can be viewed online at

or you may contact the Water System to obtain copies of specific assessments.

A wellhead protection plan is available for your review by contacting Bobby Hensley of the Hornsby Water System at 658-6188.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Este informe contiene información muy importante. Tradúscalo o hable con alguien que lo entienda bien.

For more information about your drinking water, please call Bobby Hensley at 731-658-6188.

How can I get involved?

Our Water Board meets on the first Tuesday of each month at 7:00 pm at City Hall. Please feel free to participate in these meetings.

Is our water system meeting other rules that govern our operations?

The State and EPA require us to test and report on our water on a regular basis to ensure its safety. We have met all of these requirements. Results of unregulated contaminant analysis are available upon request. We want you to know that we pay attention to all the rules.

Other Information

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and the Tennessee Department of Environment and Conservation prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Do I Need To Take Special Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have under-gone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about not only their drinking water, but food preparation, personal hygiene, and precautions in handling infants and pets from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Lead in Drinking Water

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Hornsby Water System is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at

Water System Security

Following the events of September 2001, we realize that our customers are concerned about the security of their drinking water. We urge the public to report any suspicious activities at any utility facilities, including tanks, fire hydrants, etc. to 609-0997.

Think before you flush!

Flushing unused or expired medicines can be harmful to your drinking water. Properly disposing of unused or expired medication helps protect you and the environment. Keep medications out of Tennessee's waterways by disposing in one of our permanent pharmaceutical take back bins. There are nearly 100 take back bins located across the state, to find a convenient location please visit:

Water Quality Data

What does this chart mean?

- **MCLG** - Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **MCL** - Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.
- **MRDL**: Maximum Residual Disinfectant Level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for the control of microbial contaminants.
- **MRDLG**: Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- **AL** - Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- **Below Detection Level (BDL)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected.
- **Non-Detects (ND)** - laboratory analysis indicates that the contaminant is not present.
- **Parts per million (ppm) or Milligrams per liter (mg/l)** - explained as a relation to time and money as one part per million corresponds to one minute in two years or a single penny in \$10,000.
- **Parts per billion (ppb) or Micrograms per liter** - explained as a relation to time and money as one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- **RTCR** - Revised Total Coliform Rule. This rule went into effect on April 1, 2016 and replaces the MCL for total coliform with a Treatment Technique Trigger for a system assessment.
- **TT** - Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.

Contaminant	Violation Yes/No	Level Found	Range of Detections	Date of Sample	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Total Coliform Bacteria (RTCR)	No	0		2017		0	TT Trigger	Naturally present in the environment
Combined radium	No	2.93 AVG	1.53-4.6	2014	PCi/l	0	5	Erosion of natural deposits
Copper ¹	No	0.137		2017	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead ¹	No	1.67		2017	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Sodium	No	10.3	7.28-10.3	2017	ppm	N/A	N/A	Erosion of natural deposits; used in water treatment
Haloacetic Acids (HAA5)	No	<2.0		2017	ppb	N/A	60	By-product of drinking water disinfection.
TTHM [Total trihalomethanes]	No	23.4		2017	ppb	n/a	80	By-product of drinking water chlorination
Chlorine	No	AVG 0.9	0.7-1.1	2017	ppm	MRDLG 4	MRDL 4	Water additive used to control microbes.

Iron: Iron occurs naturally in our raw water and occasionally accumulates in the distribution system. Iron shows up as "red" or "rusty" water at your tap. Although you do not want to drink water that is not clear, iron is not considered to be a hazard to your health. We test for iron daily and it is usually around 0 ppm. The aesthetic limit for iron is 0.3 ppm.

¹During the most recent round of Lead and Copper testing, 0 out of 30 households sampled contained concentrations exceeding the action level.

LEGALS

IN THE CHANCERY COURT FOR HARDEMAN COUNTY, TENNESSEE AT BOLIVAR - PROBATE DIVISION

IN THE MATTER OF: ESTATE OF NORMAN RHODES DECEASED.

JESSE C. RHODES, Petitioner, DOCKET NO. P-2130

vs.

WILLIAM R. RHODES, and ERNEST C. RHODES, and DELOIS RHODES WRIGHT, and NORMAN RHODES, II, and THERESA RHODES, and TONYA RHODES, and EVA RHODES, and JERRY RHODES, and UNKNOWN HEIRS OF NORMAN RHODES, DECEASED.

Respondents.

WHEREFORE, IT IS THEREFORE ORDERED that the Clerk of this Court shall cause the following notice to be published for four (4) consecutive weeks in the The Bulletin-Times, which is a newspaper of general circulation in this county:

TO: William R. Rhodes; Delois Rhodes Wright; Norman Rhodes, II; Theresa Rhodes; Tonya Rhodes; Eva Rhodes; Jerry Rhodes; and any unknown heirs of Norman Rhodes, deceased, and any unknown parties claiming an interest in certain real property located at 1600 Newsom Road (Map 045, Parcel 008.00) and at Norment Lane (Map 45, Parcel 008.30),, each in Hardeman County, Tennessee, and more particularly described as follows (the "Property"):

Tract 1, Map 45, Parcel 8.30, Hardeman County, Tennessee

Beginning at a old 1 inch iron pipe being the southeast corner of the Angela Fay Taylor property (Deed Book 88 Page 127), being on the west line of the John L. Bass property (Deed Book 57 Page 858), and said iron pipe being the northeast corner of the Norman Rhodes property (Deed Book O15 Page 467), which is the herein described property; thence South 03 degrees 36 minutes 00 seconds West coincident with a west line of the said John L. Bass property and at times with old fence a distance of 643.17 feet to a 40 inch twin red oak tree (as per Deed Book 19 Page 476); thence along north lines of the Mark McKenzie and wife, Veronica McKenzie property (Deed Book 19 Page 476) and generally along old fence the following six (6) courses and distances:

(1) North 77 degrees 03 minutes 30 seconds West a distance of 161.64 feet to a 6 inch elm tree with old fence embedded;

(2) South 88 degrees 49 minutes 39 seconds West a distance of 301.45 feet to an old stump with old fence embedded;

(3) North 87 degrees 02 minutes 05 seconds West a distance of 66.92 feet;

(4) North 86 degrees 10 minutes 19 seconds West a distance of 103.93 feet;

(5) South 86 degrees 05 minutes 30 seconds West a distance of 19.68 feet;

(6) South 73 degrees 43 minutes 31 seconds West a distance of 71.12 feet to a wood fence corner post being the northwest corner of the said Mark McKenzie and wife Veronica McKenzie property;

Thence South 63 degrees 41 minutes 01 seconds West coincident with the north line of Normant Lane a distance of 40.20 feet to a new capped 1/2 inch rod, (typical of all iron rods in this description referred to as new); thence coincident with east and north lines of the Will Williams property (Map 45, Parcel, 8.25, Deed Book 17 Page 315) the following two (2) courses and distances:

(1) North 15 degrees 19 minutes 03 seconds West a distance of 157.34 feet to a new iron rod;

(2) South 7 degrees 35 minutes 19 seconds West a distance of 53.20 feet to an old 1/2 inch iron rod being the southeast corner of the Will Williams property (Map 45, Parcel 8.23, Book 17, Page 315)

Thence North 15 degrees 20 minutes 22 seconds West coincident with the east line of the said Will Williams property (Map 45, Parcel 8.23, Book 17, Page 315) and passing through a series of metal fence posts a distance of 603.44 feet to an old 1/2 inch iron rod; thence South 86 degrees 26 minutes 41 seconds East coincident with the south line of said Angela Fay Taylor property and at times with old fence a distance of 1,041.89 feet to the point of beginning, having an area of 13.55 acres.

Being a portion of the property conveyed to Norman Rhodes in

Deed Book R-3, page 373 and Deed Book o-15, page 467 in the Register's Office of Hardeman County, Tennessee.

Tract 2, Map 045, Parcel 8.00, Hardeman County, Tennessee

Beginning at an old bed rail being a northeast corner of the John Bass property (Deed Book 57 Page 850), being on the west line of the Larry O. Elrod, Jr. and wife, Eve Elrod property (Deed Book 86 Page 280, and being the southeast corner of the Norman Rhodes property (Map 045 Parcel 8.00, Deed Book 015 Page 467, Deed Book B14 Page 271, and Deed Book R3 Page 373), which is the herein described; thence coincident with north and east lines of the John Bass property the following five (5) courses and distances:

(1) North 88 degrees 51 minutes 16 seconds West a distance of 356.50 feet to an old mower blade;

(2) South 84 degrees 38 minutes 09 seconds West a distance of 262.08 feet to an old 1 1/2 inch iron pipe;

(3) South 85 degrees 32 minutes 12 seconds West a distance of 34.32 feet to a new capped 1/2 inch iron rod, (typical of all irons in this description referred to as new);

(4) North 03 degrees 02 minutes 24 seconds East a distance of 1,358.34 feet to an old bed rail;

(5) North 86 degrees 01 minute 52 seconds West a distance of 121.71 feet to a new iron rod;

Thence coincident with east lines of the Daniel Jones property (Map 045 Parcel 8.21, Deed Book 72 Page 305, Tract I) the following two courses and distances:

(1) North 41 degrees 04 minutes 07 seconds East a distance of 215.70 feet to a new iron rod;

(2) North 13 degrees 13 minutes 26 seconds West a distance of 109.43 feet to a new iron rod;

Thence coincident with south, east, and north lines of the Daniel Jones property (Map 045 Parcel 8.26, Deed Book 72 Page 305) the following three (3) courses and distances:

(1) North 85 degrees 58 minutes 39 seconds East a distance of 190.68 feet to an old 1/2 inch iron rod;

(2) North 03 degrees 10 minutes 29 seconds East a distance of 502.07 feet to an old 1/2 inch iron rod;

(3) North 86 degrees 49 minutes 17 seconds West a distance of 115.57 feet to an old 1/2 inch iron rod;

Thence coincident with east and north lines of the Tanya S. Robertson property (Map 045 Parcel 8.27 and Parcel 8.28, Deed Book 23 Page 50) the following two (2) courses and distances:

(1) North 03 degrees 10 minutes 29 seconds East a distance of 376.00 feet to an old 1/2 inch iron rod

(2) North 86 degrees 49 minutes 31 seconds West passing through an old 1/2 inch rod at 232.47 feet and continuing on for a total 257.49 feet to a point in the apparent center of Newsom Road;

Thence North 03 degrees 40 minutes 23 seconds East coincident with the apparent center of said Newsom Road a total distance of 48.99 feet; thence coincident with south and east lines of the Joe Ivy Crisp property (Deed Book Q7 Page 362 and Deed Book H7 Page 228) the following two (2) courses and distances:

(1) North 82 degrees 58 minutes 33 seconds East passing through a new iron rod at 20.61 feet and continuing on for a total distance of 170.61 feet to a new iron rod;

(2) North 15 degrees 41 minutes 03 seconds East a distance of 150.00 feet to an old metal T-post;

Thence North 05 degrees 32 minutes 12 seconds West coincident with the east line of the Dolores Jones property (Deed Book E15 Page 567 and Deed Book F7 Page 109) a distance of 81.12 feet to an old 1/2 inch iron rod; thence North 06 degrees 39 minutes 17 seconds West coincident with the east line of the Deon Simmons and wife, Angelous Simmons property (Map 045 Parcel 8.15, Deed Book 77 Page 870) a distance of 75.00 feet to an old 1/2 inch iron rod; thence coincident with south and east lines of the Annie Hudson property (Deed Book 34 Page 416 and Deed Book 34 Page 514) the following three (3) courses and distances:

(1) North 83 degrees 10 minutes 11 seconds East a distance of 26.00 feet to an old 1/2 inch iron rod;

(2) North 69 degrees 17 minutes 05 seconds East a distance of 76.20 feet to an old 1/2 inch iron rod;

(3) North 03 degrees 01 minute 05 seconds East a distance of 100.04 feet to an old 1/2 inch iron rod;

Thence North 03 degrees 44 minutes 52 seconds East a distance of 108.41 feet to an old 2 inch iron pipe; thence South 76 degrees 12 minutes

28 seconds East coincident with the south margin of Norment Lane a distance of 46.77 feet to a new iron rod being "46 feet east of Higgs lot" as per Deed Book A14 Page 364, Lot #1); thence South 03 degrees 23 minutes 33 seconds West "on the east margin of a proposed road" as per Deed Book A14 Page 364-Lot #1) a distance of 155.00 feet to a new 1/2 inch iron rod; thence North 84 degrees 24 minutes 39 seconds East a distance of 169.32 feet to an old 3/4 inch pipe; thence coincident with south and east lines of the Jerry Crisp property (Map 045 Parcel 8.24, Deed Book 115 Page 177) the following two (2) courses and distances:

(1) North 67 degrees 09 minutes 05 seconds East a distance of 150.00 feet to a new iron rod;

(2) North 17 degrees 55 minutes 42 seconds West a distance of 55.00 feet to a new iron rod;

Thence coincident with south and east lines of the Betty Cole Crisp property (Deed Book Z9 Page 495) the following two (2) courses and distances:

(1) North 64 degrees 28 minutes 22 seconds East a distance of 24.98 feet to a new iron rod;

(2) North 03 degrees 01 minute 10 seconds East a distance of 100.00 feet to a new iron rod;

Thence North 64 degrees 28 minutes 27 seconds East coincident with the south margin of said Norment Lane a distance of 15.83 feet; thence South 09 degrees 52 minutes 00 seconds East passing through an old 1/2 inch iron rod at 8.16 feet being the northwest corner of the Tarus D. McNeai property (Deed Book 24 Page 423) and continuing on for a total distance of 308.29 feet to an old 1/2 inch iron rod; thence North 76 degrees 15 minutes 35 seconds East continuing with the south line of the said Tarus D. McNeai property a distance of 124.63 feet to an old 1/2 inch iron rod in an old fence line; thence South 02 degrees 57 minutes 27 seconds West coincident with the west line of the Mark McKenzie and wife, Veronica McKenzie property (Deed Book 19 Page 476, Tract No. 1) and at times with old fence a distance of 1,285.24 feet to an old flagged tree stump with old fence embedded; thence coincident with the west line of the Larry O. Elrod, Jr. and wife, Eve Elrod property (Deed Book 86 Page 280) and generally along old fence the following four (4) courses and distances:

(1) South 03 degrees 52 minutes 15 seconds West a distance of 394.15 feet;

(2) South 03 degrees 20 minutes 05 seconds West a distance of 519.40 feet;

(3) South 02 degrees 39 minutes 31 seconds West a distance of 443.86 feet;

(4) South 02 degrees 37 minutes 31 seconds East a distance of 298.41 feet to the point of beginning.

Due to ambiguities in the following parcels: Map 045, Parcels 34.00, 34.01, 34.02, 34.03, and 8.17, located near the south end of the herein described property, consisting of approximately 0.58 acres (by deed measurements) is hereby excluded and a net acreage of 40.47 acres is calculated for the said herein described property.

Being a portion of the property conveyed to Norman Rhodes in Deed Book R-3, page 373 in the Register's Office of Hardeman County, Tennessee.

A Petition to Sell Real Estate to Pay Debts of Estate, captioned In The Matter of: Estate of Norman Rhodes, Deceased. Jessie C. Rhodes v. William R. Rhodes, Ernest C. Rhodes, Delois Rhodes Wright, Norman Rhodes, LL, Theresa Rhodes, Tonya Rhodes, Eva Rhodes, Jerry Rhodes, and Unknown Heirs of Norman Rhodes, Deceased, No. P-2130, has been filed in the Chancery Court for Hardeman County, Tennessee. Any such heirs or parties claiming an interest in the Property are required to file a response to said petition with the Chancery Court of Hardeman County, located at the Hardeman County Courthouse, P.O. Box 45, Bolivar, TN, 383008, by June 11, 2018, and if no response is filed, default judgment will be entered against them.

This 12th day of April, 2018. JANICE M. BODIFORD, CLERK AND MASTER

NOTICE OF TRUSTEE'S SALE

WHEREAS, default has occurred in the performance of the covenants, terms, and conditions of a Deed of Trust Note dated July 16, 2003, and the Deed of Trust of even date securing the same, recorded July 17, 2003, in Book No. 592, at Page 263, in Office of the Register of Deeds for Hardeman County, Tennessee,

executed by Willie R. Joy, Sr. and Lassie Vanessa Joy, conveying certain property therein described to Hornsby Law Firm as Trustee for First Franklin Financial Corporation; and the undersigned, Wilson & Associates, P.L.L.C., having been appointed Successor Trustee by Wells Fargo Bank, N.A., as Trustee for the Pooling and Servicing Agreement dated as of February 1, 2004 First Franklin Mortgage Loan Trust Mortgage Loan Asset-Backed Certificates, Series 2004-FF1.

NOW, THEREFORE, notice is hereby given that the entire indebtedness has been declared due and payable; and that an agent of Wilson & Associates, P.L.L.C., as Successor Trustee, by virtue of the power, duty, and authority vested in and imposed upon said Successor Trustee, by Wells Fargo Bank, N.A., as Trustee for the Pooling and Servicing Agreement dated as of February 1, 2004 First Franklin Mortgage Loan Trust Mortgage Loan Asset-Backed Certificates, Series 2004-FF1, will, on May 21, 2018 on or about 10:00 AM, at the Hardeman County Courthouse, Bolivar, Tennessee, offer for sale certain property hereinafter described to the highest bidder FOR certified funds paid at the conclusion of the sale, or credit bid from a bank or other lending entity pre-approved by the successor trustee. The sale is free from all exemptions, which are expressly waived in the Deed of Trust, said property being real estate situated in Hardeman County, Tennessee, and being more particularly described as follows:

Beginning at a stake on the south line of Austin 1 acre lot, this point being South 48 degrees 30 minutes West 308 feet from a stake on west side of Vildo Road, the Southeast corner of said Austin lot; runs thence South 38 degrees East 100.3 feet with the residue of Keelon Hammons; thence South 48 degrees 30 minutes West 316 feet with Harry M. Bishop 10 acres; thence the following 6 calls with Herron and Stewart and Austin: (1) North 51 degrees 15 minutes West 156 feet; (2) North 18 degrees East 196 feet; (3) South 66 degrees 30 minutes East 50 feet; (3) North 48 degrees 30 minutes East 30 feet; (4) South 45 degrees East 102

Seeking Bids

Hardeman County is seeking bids for the following:
Fountain Plumbing materials
Fountain/Splash pad surface covering
LED Fountain/Splash pad lighting
Fountain/splash pad materials installation
Concrete finishing of in ground fountain/splash pad
Complete material listing and specifications may be obtained at the office of the County Mayor, 100 Main Street, Bolivar, Tennessee. Bids will be received until 9 am on May 21, 2018 when there will be a public bid opening in the office of the Mayor. Hardeman County reserves the right to reject any or all bids and to accept the bid that is deemed to be in the best interest of the County.

NOTICE OF INVITATION TO BID

The Hardeman County Board of Education, School Nutrition Program Department is requesting bids for a 60-gallon stationary Gas Kettle. Complete bid instructions and the bid specification document may be picked up from the School Nutrition Program Department, Hardeman County Board of Education, 10815 Old Highway 64, West, Bolivar, Tennessee 38008 by 9:30 a.m. on Thursday, May 31, 2018. The bids will be opened beginning at 10:00 a.m.

If interested in bidding, contact Martha Robertson, Hardeman County School Nutrition Program Supervisor at 731-658-2510 ext. 125.

The Hardeman County Board of Education reserves the right to accept or reject all bids.

This institution is an Equal Opportunity Employer

Bolivar Housing Authority BID PROPOSAL

For Cleaning, Coating, Stripping and Repairing of Asphalt Pavement and Parking Lots at Hatchie Haven and Chickasaw Village Developments and Dr. Martin Luther King, Jr. Drive (Eastside Court)

Notice is hereby given that Bolivar Housing Authority (Authority), 621 Hatchie Haven, Bolivar, Tennessee 38008 (owner) shall accept bids for cleaning, coating, stripping and repairing of joints and cracks in street and parking lot asphalt pavements.

Approximately 65, 900 sq. feet of asphalt will be cleaned, coated, repaired and stripped where needed.

Bids for seal coating, joint and crack repair, patchwork and re-striping (as needed) of the street, cove and parking spaces at

1. Hatchie Haven Street, including cove and parking spaces;
2. Parking lots at Chickasaw Village (Naylor Street and Fair ground Street); and
3. Dr. Martin Luther King, Jr. Drive

Bid proposals are to be completed and mailed and received, emailed or hand delivered to the address listed below by:

Friday June 1, 2018 at 10:00 a.m.

Bid proposals will be publicly opened and read aloud at the above stated time at 621 Hatchie Haven, Bolivar, Tennessee 38008. Proposals not physically received on the above date and time will not be considered for award.

All proposals should be addressed to:

Bolivar Housing Authority-

Spring Creek Utility District Water Quality Report for 2017

Is my drinking water safe?

Yes, our water meets all of EPA's health standards. We have conducted numerous tests for over 80 contaminants that may be in drinking water. As you'll see in the chart on the back, we only detected six of these contaminants. We found all of these contaminants at safe levels.

What is the source of my water?

Your water, which is ground water, comes from Bolivar, whose water comes from a sand aquifer. Our goal is to protect our water from contaminants and we are working with the State to determine the vulnerability of our water source to **potential** contamination. The Tennessee Department of Environment and Conservation (TDEC) has prepared a Source Water Assessment Program (SWAP) Report for the untreated water sources serving water to this water system. The SWAP Report assesses the susceptibility of untreated water sources to **potential** contamination. To ensure safe drinking water, all public water systems treat and routinely test their water. Water sources have been rated as reasonably susceptible, moderately susceptible or slightly susceptible based on geologic factors and human activities in the vicinity of the water source. The Spring Creek Utility District sources rated as reasonably susceptible to potential contamination.

An explanation of Tennessee's Source Water Assessment Program, the Source Water Assessment summaries, susceptibility scorings and the overall TDEC report to EPA can be viewed online

or you

may contact the Water System to obtain copies of specific assessments.

A wellhead protection plan is available for your review by contacting Tim Warren at the Spring Creek Utility District.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Este informe contiene información muy importante. Tradúscalo o hable con alguien que lo entienda bien.

For more information about your drinking water, please call Tim Warren at 658-6559.

How can I get involved?

Our Water Board meets on the fourth Monday of each month at 4:00 pm at the utility office, which is located at 95 Hope Street. Please feel free to participate in these meetings.

Commissioner Selection

The Commissioners of Spring Creek Utility District serve four year terms. Vacancies on the Board of Commissioners are filled by the vote of the remaining Commissioners in office. Decisions by the Board of Commissioners on customer complaints brought before the Board of Commissioners under the District's customer complaint policy may be reviewed by the Utility Management Review Board of the Tennessee Department of Environment and Conservation pursuant to Section 7-82-702(7) of Tennessee Code Annotated.

Is our water system meeting other rules that govern our operations?

The State and EPA require us to test and report on our water on a regular basis to ensure its safety. We have met all of these requirements. Results of unregulated contaminant analysis are available upon request. We want you to know that we pay attention to all the rules.

Other Information

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the

surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and the Tennessee Department of Environment and Conservation prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Do I Need To Take Special Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have under-gone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about not only their drinking water, but food preparation, personal hygiene, and precautions in handling infants and pets from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Lead in Drinking Water

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Spring Creek Utility District is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at

Water System Security

Following the events of September 2001, we realize that our customers are concerned about the security of their drinking water. We urge the public to report any suspicious activities at any utility facilities, including treatment plants, tanks, fire hydrants, etc. to 658-6559.

Think before you flush!

Flushing unused or expired medicines can be harmful to your drinking water. Properly disposing of unused or expired medication helps protect you and the environment. Keep medications out of Tennessee's waterways by disposing in one of our permanent pharmaceutical take back bins. There are nearly 100 take back bins located across the state, to find a convenient location please visit:

W a t e r Q u a l i t y D a t a

What does this chart mean?

- **MCLG** - Maximum Contaminant Level Goal, or the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **MCL** - Maximum Contaminant Level, or the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.
- **MRDL**: Maximum Residual Disinfectant Level or MRDL: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for the control of microbial contaminants.
- **MRDLG**: Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- **AL** - Action Level, or the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- **Below Detection Level (BDL)** - laboratory analysis indicates that the contaminant is not present at a level that can be detected. **Non-Detects (ND)** - laboratory analysis indicates that the contaminant is not present.
- **Parts per million (ppm) or Milligrams per liter (mg/l)** - explained as a relation to time and money as one part per million corresponds to one minute in two years or a single penny in \$10,000.
- **Parts per billion (ppb) or Micrograms per liter** - explained as a relation to time and money as one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- **Million Fibers per Liter (MFL)** - million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.
- **RTCR** - Revised Total Coliform Rule. This rule went into effect on April 1, 2016 and replaces the MCL for total coliform with a Treatment Technique Trigger for a system assessment.
- **TT** - Treatment Technique, or a required process intended to reduce the level of a contaminant in drinking water.
- **AVG** - Average

Contaminant	Violation Yes/No	Level Found	Range of Detections	Date of Sample	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Total Coliform Bacteria (RTCR)	No	0		2017		0	TT Trigger	Naturally present in the environment
Copper ¹	No	0.00607 90 th Percent		2017	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Fluoride	No	0.448 AVG	0.38-0.63	2017	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Lead ¹	No	1.36 90 th Percent		2017	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Sodium	No	9.82		2017	ppm	N/A	N/A	Erosion of natural deposits; used in water treatment
TTHM [Total trihalomethanes]	No	27.3		2017	ppb	n/a	80	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	No	6.8		2017	ppb	N/A	60	By-product of drinking water disinfection.
Chlorine	No	AVG 1.36	1.2-1.6	2017	ppm	MRDLG 4	MRDL 4	Water additive used to control microbes.

Iron: Iron occurs naturally in our raw water and occasionally accumulates in the distribution system. Iron shows up as "red" or "rusty" water at your tap. Although you do not want to drink water that is not clear, iron is not considered to be a hazard to your health. We test for iron daily and it is usually around 0.1 ppm. The aesthetic limit for iron is 0.3 ppm.

¹During the most recent round of Lead and Copper testing, only 0 out of 20 households sampled contained concentrations exceeding the action level.

Mother's Day - Financial Gifts for Your Adult Children

Mother's Day is almost here. If you're a mother with grown children, you might receive flowers, candy, dinner invitations or some other type of pleasant recognition. However, you might find that you can get more enjoyment from the holiday by giving, rather than receiving. The longest-lasting gifts may be financial ones - so here are a few moves to consider:

Contribute to your child's IRA. If your children have earned income, they are eligible to contribute to an IRA, which offers tax benefits and an almost unlimited array of investment options. You can't contribute directly to another person's IRA, but you can write your child a check for that purpose. This could be a valuable gift, as many people can't afford to contribute the maximum yearly amount, which, in 2018, is \$5,500, or \$6,500 for those 50 or older.

Give gifts of stock. You know your children pretty well, so you should be familiar with the products they buy. Why not give them some shares of stock in the companies that make these products? Your children will probably enjoy being "owners" of these companies, and if they weren't that familiar with how the financial markets work, having these shares in their possession may greatly expand their knowledge and lead to an even greater interest in investing.

Donate to a charity in your child's name. You might want to donate to a charitable organization that your child supports. In years past, such a donation might have earned you a tax deduction, but the new tax laws, which include a much higher standard deduction, may keep many people from itemizing. Still, it's possible for a charitable gift to provide you with a tax benefit, depending on your age. If you're 70 1/2 or older, you must start taking withdrawals from your traditional IRA and your 401(k) or similar employer-sponsored plan, but by moving the withdrawal directly to a qualified charitable group, the money won't count as part of your adjusted gross income, so, in effect, you can get a tax break from your generosity.

Review your estate strategy. Like virtually all parents, you'd probably like to be able to leave some type of legacy to your children, and possibly your grandchildren, too. So, if you haven't already started working on your estate strategy, consider using Mother's Day as a launching point. At the very least, you'll want to write your will, but you may need much more than that, such as a living trust, a durable power of attorney and other documents. And don't forget to change the beneficiary designations on your life insurance and retirement accounts if you've experienced a major life change, such as divorce or remarriage. These designations are powerful and can even supersede whatever instructions you might have left in your will. As you can guess, estate planning can be complex, so you almost certainly will want to work with a legal professional to get your arrangements in order.

Mother's Day is a good opportunity for your children to show their love for you, and you can do the same for them by helping bolster their long-term security through financial gifts and legacy planning.

Bolivar Energy Authority Wins Safety Award

Bolivar Energy Authority has earned the American Public Power Association's Safety Award of Excellence for safe operating practices in 2017. The utility earned the first-place award, demonstrating exceptional dedication to a culture of safety, with 60,000 - 110,000 worker-hours of annual worker exposure during 59th annual Engineering and Operations Technical Conference held in Raleigh, NC.

"Bolivar Energy Authority is proud of its safety record," said John Fortune, President/CEO of Bolivar Energy Authority. "The award is a testament to the hard work that goes into ensuring that our employees go home safe to their families every day."

OBITUARIES

OLLIE FAYE HAWKINS NEWMAN

SEPTEMBER 20, 1934 - APRIL 29, 2018

Ollie Faye Hawkins Newman, age 83, of Bolivar, departed this life early Sunday morning, April 29, 2018 at Jackson-Madison County General Hospital.

The widow of Edward G. Newman, who died in 2008 after 21 years of marriage, she was a homemaker, also working as a CNA at Collierville Nursing Home and as a factory worker at Kilgore in Toone. She was born September 20, 1934, daughter of the late Bob Neely Hawkins and Euphia Earnest Hawkins and spent most of her life in the county. She was a member of Ebenezer Baptist Church in Toone.

Services were 11 a.m. Wednesday, May 2, 2018 at Shackelford Funeral Directors chapel in Middleton with Matt Emerson officiating. Burial was in Rogers Springs Cemetery.

Survivors include eight step children; two nieces, Betty Wiggins of Pocahontas and Susie Cornelius of Ripley, MS; three nephews, Christopher Hawkins of Pocahontas and Franklin and Kenneth James Hawkins, both of Ripley, MS; and several great nieces and nephews. In addition to her husband and parents, she was preceded in death by two brothers, Alex James Hawkins and Horace Willie Hawkins; and two nephews, James Wayne Hawkins and Freddie Hawkins.

LORETTA FRANCES HARRIS

DECEMBER 18, 1956 - APRIL 28, 2018

Loretta Frances Harris, 61, of Bolivar was called home to rest on Saturday, April 28, 2018.

She was born on December 18, 1956 to the late Corine Blaylock and Willis Dickerson.

Her funeral was held on Saturday May 5, 2018 at 1:00 p.m. at Zion Temple Worship Center with Evangelist Daisy Harvey in charge. Burial was in the Bartlett Chapel CME Church Cemetery-Whiteville and Dixie Funeral Home was in charge of the professional service.

She was educated at Allen-White School until she relocated to New York where she lived for several years. She returned to Tennessee and married her husband, George Harris. They were married forty-five years.

She accepted Jesus Christ at a young age and joined Green Grove MBC but later attended Bartlett Chapel with her husband. She and George lived in New Orleans, LA several years and later returned to Tennessee.

Preceding her in death were her parents and one child, Danny Harris.

They leave to cherish their children, Sammie (Betty) Green, Jr., Anthony Blaylock, Stacy, Shemika, Frances, George III (Chasity), Shalome Harris, Emma Sails and Bobby (Lynn) Boyle; seven siblings, Willis (Carolyn) Dickerson, Jr., Patricia (Eric) Beasley, Lafayette (Teresa) Dickerson, Satoria (Don) Hardin, Teresa Sain and Derodo (Tammy) Dickerson; nine grandchildren and one great grandchild; many other relatives and friends that will truly miss her.

CHRISTOPHER LAVON CHEAIRS

OCTOBER 22, 1972 ~ APRIL 18, 2018

Christopher Lavon Cheairs was born on October 22, 1972 to Ralph and Bobby Cheairs in Madison County, Tennessee.

His funeral service was held on Saturday April 28, 2018 at 2:00 p.m. at Mt. Olive MBC with Minister Ericko Sain in charge. Burial was in the Jordan Cemetery and Dixie Funeral Home was in charge of the professional service.

Chris graduated from Bolivar Central High School in May of 1991. During his school years, he was a member of the football team.

He will be remembered by his family and friends in their own special way.

His hobbies consisted of fishing, music, and playing video games. He professed hope in Christ at an early age and united with the Mount Olive Missionary Baptist Church where he remained until his health failed. Chris departed this world on April 18, 2018.

Chris is survived by his loving parents: Bobby Cheairs, Bolivar, TN., Ralph (Tabitha) Cheairs of Memphis, TN., three loving daughters: Tiffany Cheairs, Saulsbury, TN., Shantrell Cheairs, Clarksville, TN., Andrea Cheairs, Brownsville, TN. Two granddaughters: Serenity Cheairs and Kenndi Mason. Two brothers: Marcus and Antonio Cheairs of Bolivar, TN. A host of nieces, nephews, aunts, uncles, cousins, and friends. Also, a very special friend, Victoria Wilson, Pinson, TN.

MELODY ANN SIMONS RUSSELL

JUNE 9, 1983 ~ APRIL 29, 2018

Melody Ann Simons Johnson Russell, age 34, of Murfreesboro, TN passed away on Sunday, April 29, 2018.

She is survived by her children, Samantha Claire Johnson and Brady Campbell Johnson both of Nashville; parent, Jimmy and Sherry Simons of Middleton, TN; grandmother, Shirley Ann Koelsch of Spring Hill, TN; uncles, Rex Koelsch and his wife Marie of Tulsa, OK and Andy Koelsch and his wife Celia of Anchorage, AK; aunt, Lesa Massengill and her husband Jon of Murfreesboro; step-brothers, Andy Simons and his wife Brandi of Whiteville, TN and Mike Simons and his wife Jacque of Rossville, TN; along with much loving extended family.

Melody was a graduate of Middle Tennessee State University. She received her bachelor's degree in Social Work and was employed with Trustpoint Hospital in Murfreesboro. She was a loving mother and will be greatly missed by all those who knew her.

In lieu of flowers, the family request memorials be made to St. Jude Children's Hospital or to Vanderbilt Children's Hospital.

THANK YOU

The family of Bonnie McLain wishes to thank you for the prayers, concern and the nurses that helped her through it all. A very special Thank You!!

We couldn't have done it without your help and support.

God Bless you,

Mary Wilbank and Robbie Robertson

CEMETERY MONUMENTS

JACQUELINE ANN CHEAIRS JULY 19, 1962 ~ MARCH 15, 2018

Miss Jacqueline Ann Cheairs was born to the late Mr. Sylvester, Sr. and Mrs. Lena Mae Cheairs on July 19, 1962 in Hardeman County, TN.

Her funeral service was held on Saturday, March 24, 2018 at the Jerome Boyd Chapel at Dixie FH at 1:00 p.m. with Reverend Tony Kerney charge. Burial was in the Mt. Salem MB Church cemetery and Dixie Funeral Home was in charge of the professional service.

Jacqueline grew up in The Hickory Valley TN community. She received her education and graduated from Bolivar Central High School in 1981.

Jacqueline accepted Christ as her Savior at an early age and joined the New Hope M.B. Church in Hickory Valley, TN. She continued to serve the Lord until her health failed.

On March 15, 2018, an Angel came knocking and Jacqueline "Ann" Cheairs was called to her eternal rest at Jackson Madison County General Hospital. She was preceded in death by her parents, her brother Barry Cheairs, a sister in-law Ethel Cheairs, a brother in-law, Mick Mickens, two great nieces, Shenika & Jakyia Cheairs, three uncles: Shiloh, Jr, Jerry Lee and Franklin Roosevelt Cheairs.

Jacqueline leaves to cherish her memories: five brothers: Larry, Sylvester Jr. (Joyce) Cheairs of Memphis, TN, Anthony (Linda), Deon Cheairs of Savannah, TN, Steven Cheairs of Bolivar, TN. four sisters: Vivan Mickens of Chesapeake, Virginia, Lavoris, Mary "Mae Toy", and Janice Cheairs of Bolivar, TN, eight nephews, eight nieces, a "special" companion of twenty + years Roy Hendrix, and his three children, a godson: Antonio Luellen that she raised as her own, one uncle: Jerry L. Parham and three aunts: Coren Reaves, Chelsea Parham and Glendora Polk, and a host of other family and friends.

NED JOY FEBRUARY 12, 1963 ~ MARCH 14, 2018

Mr. Ned Joy was born on February 12, 1963, in Bolivar, Tennessee to Walter Joy, Jr. and Liller Mae Joy. He was called home to eternal rest on March 14, 2018.

His funeral service was held on Saturday March 24, 2018 at Church Road church of Christ at 12:00 noon with Pastor Arthur Lee McKinnie charge. Burial was in the church cemetery and Dixie Funeral Home was in charge of the professional service

He attended Bolivar Central High and graduated in 1983. He accepted Christ at an early age as his personal savior and joined New Hope Missionary Baptist Church. He was well known for his hard work and dedication at many sawmills and for his cheerful and playful personality. Ned was preceded in death by his twin Ted Joy, and by brothers Levi Joy, and Walter Joy, III.

He leaves to cherish his memories his parents Walter Joy, Jr. and Liller Mae Joy; a wife, Joyce Joy; one daughter, Shatoya (Tory) Blakemore of Bolivar, TN; eight grandchildren, five boys and three girls: Jaquan Blakemore, Javon Blakemore, Shakiya Blakemore, Tamyia Blakemore, Sicarra Blakemore, Jakarian Blakemore, Kentravious Blakemore, Shatoria Brown; six brothers: Charlie (Shirley) Joy, Otha L. Joy, Worley R. Joy, Eddie (Peggy) Joy, Michael L. Joy all of Whiteville, TN and Avery (Thelma) Joy of Grand Junction, TN; one sister: Patricia (David) Perry of Saulsbury, TN; a host of uncles, aunts, nieces, nephews, cousins and friends.

PARLINA JUSTICE JANUARY 26, 1938 ~ APRIL 16, 2018

Mrs. Parlina Whisnant Justice, 80, of Middleton was born on January 26, 1938 in Middleton to the late Ruben and Emma Jones Whisnant.

Her funeral service was held on Saturday, April 28, 2018 at 12:00 noon at the Jerome Boyd Chapel at Dixie Funeral Home with Reverend David L. Perry in charge. Burial was in the Mt. Zion Cemetery.

She attended the Hardeman County public schools and was a member of Bowden Hill CME Church. She was a talkative and fun loving person.

She was married to James Andrew Justice until his death. Preceding her in death were her parents and husband; two siblings, Alice Minor and Othar lee Whisnant and one son, Othar Marlon Justice.

She leaves to cherish her memory one sister, Flossie Mae Brooks; three children, Delitha (James) Mitchell, James and David Justice; five grandchildren, eight great-grandchildren and a host of other relatives that will miss her.

BOBBIE JOYCE COBLE JULY 1, 1933 ~ MARCH 14, 2018

Bobbie Joyce Coble was the 5th of eight children born to Coliver and Willie Mae Ross of Henderson, Tennessee. She worked really hard like her parents and was from a family of strong women with backbone, her mother having lost their father to a heart attack in his 40s and went on to successfully raise all of her children to be dedicated hard workers who trusted in the Lord and believed in the power of His might. Bobbie Joyce was dearly loved by those who knew her.

Her funeral service was held on Saturday, March 17, 2018 at Church Road Church of Christ at 12:00 noon with Minister Larry Prince charge. Burial was in the Bolivar Community Cemetery and Dixie Funeral Home was in charge of the professional service.

Bobbie Joyce, called "Pudding" by her dear friends family, was added to the Lord's Church early in life at Oak Grove Church of Christ in Henderson, Tennessee. She attended school at Chester County Training School in Henderson, Tennessee and later moved to Bolivar, Tennessee after she met and married Cromwell Coble, known by his friends as "Rabbit". Bobbie Joyce was a member of Tate Road Church of Christ in Bolivar, TN. She started working for Western Mental Health Institute in Bolivar, Tennessee in 1955 and worked there as a dedicated technician for approximately 40 years. She retired after her husband, Rabbit, be-came ill and stayed home to care for him until he passed away in 2001. She lost her husband and her mother on the same day, July 14, 2001. Bobbie Joyce enjoyed fishing, quilting, canning, and gardening. She and her husband always had a beautiful garden and raised some beautiful tomatoes and cabbage every year. She enjoyed cooking and was known for her famous chicken and dumplings and her chocolate fudge cake. Pudding had a wonderful sense of humor and enjoyed feeding her cats. Once she became unable to get around actively due to her knees, she said she put a table cloth over the stove, since she no longer needed it. Bobbie Joyce had one son, Jackie Johnson, who still resides in Henderson, Tennessee. She had a loving nature and was known as the candy lady at church because she always brought Brach's peppermint, York candy, and coconut long boys to share with her friends.

Bobbie Joyce was preceded in death by her older sister, Zeldia Mickens, of Henderson, Tennessee, and two siblings, Delores Ross and Kenneth Ross, who both died while infants. She leaves to cherish her memory one son, Oliver "Jackie" Johnson (Velma) of Henderson, Tennessee, two grandsons: Timothy Johnson of Jackson, Tennessee and Phillip Johnson of Orlando, Florida, two great-granddaughters: Malea Johnson of Navarre, Florida and Ashleigh Johnson of Murfreesboro, Tennessee, and one great-great grandson, Elijah Timothy John-son of Navarre, Florida, whom she lovingly nicknamed "Bubba", two loving sisters: Armiller McKinnie of Bolivar, Tennessee, and Candie Ross Clark, of Henderson, Tennessee and two brothers: Max Curtis (Ruby Dell) Ross of Decatur, Tennessee and Stanley Ross (Surrender) of Lexington, Tennessee, and a host of loving nieces, nephews, cousins, and friends. Pudding will be dearly missed

FAITH

Sunrise: Anxiety Overload by David Coy

Many times people have shared that as a result of their loss and how they now feel if God were to take them right now they would not disagree. Essentially what I think they are saying that they do not want to continue to live the way they are living this current day nor continuing to feel the way they feel. Some people who struggle with anxiety have said if anxiety is going to control their life then they do not wish to remain here on the earth. Research has improved their understanding of anxiety to such a degree that they now know it is originates from specific events or difficulties in a person's life. Thus, a person has the power to retrain their brain to manage or eliminate their anxiety.

Symptoms may involve physical attributes of panic, flushing, and sweating. Cognitively, symptoms may exhibit overactive brain activity and dwelling excessively on one's negative concerns. This may then translate into behavior that displays avoidance of social situations that a person feels they cannot cope. Trauma and or stress may contribute to anxiety and then difficulty with social interaction. Poor sleep and nutrition can also add to anxiety and the vicious cycle of isolation from social contact continues.

One possible solution is to change what we take in to our mind (by ways of thoughts, Proverbs

Why This World is Not Our Home #2

Brought to you by the MIDWAY CHURCH OF CHRIST
 For a free Bible study appointment, contact Dwain Barnes at (731) 267-7979
 Or write to: P.O. Box 153 Middleton, TN. 38052

Notice the HCSB on I Peter 1:17, "And if you address as Father the One who judges impartially based on each one's work, you are to conduct yourselves in fear during the time of your temporary residence." It is good for us to remind ourselves why we should not treat this world as our permanent place of residence. God gives us several reasons in the scriptures, as to why, we should not long to stay on the earth beyond our days.

II. This World Is Corrupted By Sin.

The Bible teaches us that God "has granted to us his precious and very great promises, so that through them you may become partakers of the divine nature, having escaped from the corruption that is in the world because of sinful desire." (English Standard Version) Peter is telling us, that even though Christians have escaped this world by Christ's blood, we still have to live in an environment that has been dominated & corrupted by sin. For this very reason, we often feel like, this world is NOT our home. It is evident by watching the news, listening to the radio, and reading the newspaper that this world is truly a wicked place! In the news, we will often hear about bombings, school shootings, murders, rapes, and instances where children are mistreated and abused. Not to mention the rampant dishonesty, corruption, and lies told every day because of sin's desire. We ought to long to escape this sinful world, with all of its immorality! Truly, one of the great promises God offers us— is a place where sin is no longer to be found. The Bible teaches us that ".....nothing unclean, and no one who practices abomination and lying, shall ever come into it, but only those whose names are written in the Lamb's book of life."

Worldview- Part 3 by Jeff Capshaw

Previously, I defined what a worldview is, illustrated how a worldview works, listed some of the basic questions a worldview answers and urged for consistency in formulating a worldview.

I concluded the last article asserting that a Christian worldview must begin with two equally important assumptions: (1) the triune God of the Christian Scriptures exists, and (2) the Christian Scriptures are the authoritative Word of God. To some--especially in this sophisticated, modern, scientific world--such statements sound bazaar at best and absurd at worst.

The upshot is two-fold (1) the primary witness to the God of Scriptures is the Scriptures themselves, and (2) the authority of the Scriptures rest on the character of the God of Scripture. Two questions emerge. Why start with these two axioms? And, since both statements are

interdependent, doesn't that make for reasoning in a circle?
 First, a Christian thinker can't improve on the these starting points, because both God and the Scriptures are ultimate authorities. Moreover, both God and the Bible are self-attesting and self-authenticating (Rom. 1:19-20; I Timothy 3:16-17). Therefore, one can't reasonably appeal to a supposed "higher" authority (e.g. human reason or experience) to prove the existence of an "ultimate" authority (i.e. God or the Bible).

Second, isn't that "circular reasoning"? Yes, it is. But, as John Frame has said, "it is neither vicious nor fallacious" circularity. Frame adds, "God gave us our rational equipment not to deceive us but to gain knowledge." All philosophical systems draw on circular reason. Why is that the case? Because "every system draws on its own

standards to prove it conclusions" (Frame).
 For example, if one that thinks only what one sees or tests by experience is true, then he or she must presuppose that the senses are both reliable and are the ultimate authority (Empiricism). On the other hand, if one believes that human reason is the valid way to test truth claims, then he or she must presuppose that reason is both reliable and is the ultimate authority (Rationalism). If one is a skeptic (believing that nothing is surely known (Skepticism), then one has to rely on the authority of that system: certainly a self-defeating one. Therefore, everyone presupposes some ultimate authority in a line of argument, and Christians ought to start by assuming both the existence of the God of the Word and the authority of the Word of God.

OBITUARIES

VIVIAN JOYCE STEWART OCTOBER 19, 1931-MAY 5, 2018

Mrs. Vivian Joyce Stewart, age 86 of Bolivar, Tennessee, passed away Saturday afternoon, May 5, 2018 at her home in Bolivar.

Funeral services were held Tuesday, May 8, 2018 at Shackelford Funeral Directors of Bolivar with Duane Moore officiating. Interment followed in Mt. Pleasant Methodist Church Cemetery near Walnut, Mississippi.

She was born in Hardeman County and lived most all of her life here except for a time when she lived in Alcorn Co., MS. A homemaker, she was a member of Abundant Life Christian Fellowship Church in Bolivar. Mrs. Stewart is described by her family as a saintly woman who believed in practicing what she preached.

In her leisure time, she enjoyed playing, singing and writing gospel music. For a time, she was a member of "Heirborn", a gospel singing group and even recorded a CD. She also enjoyed Jimmy Swaggart broadcasts.

She is survived by son, David Newman of Bolivar; daughter, Deanna (Frankie) Howell of Bolivar; son, Terry Frank (Deborah) Newman of Adamsville; daughter, Brenda Joan (Kennie) Bivens of Jackson; daughter, Paula Annette (Gary) Lowry of Bartlett; daughter, Tammy Roxanne (Alan) Kemper of Milan and son, Anthony Joel Newman of Bolivar; 11 grandchildren; 14 great-grandchildren and two great-great-grandchildren.

She was preceded in death by a son, Johnny C. Newman and a daughter-in-law, Kathy Maria Ulianna Newman and her mother, Maude Wilbanks. She also deeply loved and respected her step-grandfather, Frederick Monroe Mills. Memorials may be sent to the Alzheimer's Association. [www.alz.org]

BRUCE C. JONES MAY 26, 1935-MAY 6, 2018

Bruce C. Jones, Jr., 82, of Chapel Hill, TN died Sunday, May 6, 2018 in Nashville, TN.

He was born in Alcorn County, MS and was the son of the late Inous and Bruce Caywood Jones, Sr. Additionally, he was preceded in death by two sisters, Geneva Weaver and Imogene Woods; and three brothers, R. G. Jones, L. B. Jones and J. A. Jones.

Mr. Jones was former manager of the Bolivar Utility District and retired as manager of the Hendersonville Utility District in Hendersonville, TN. A long-time member of the Oak Grove Independent Methodist Church near Pocahontas, TN, he later became a member and was ordained as a deacon of Dixie Hills Baptist Church in Bolivar. Most recently, he was a member of Smyrna Baptist Church in Chapel Hill.

Mr. Jones is survived by his wife of 63 years, Clara Howell Jones of Chapel Hill; two daughters, Kathryn Ann (Bruce) Coleman of Portland, TN and Karen (Ray) Moore of Hendersonville; one son, Bruce Kerry Jones of Washington, DC; two sisters, Annie Belle Norvell of Walnut, MS and Linda Sue Tilman of Somerville; one brother, L. K. Jones of Stow, MA; six grandchildren and thirteen great-grandchildren.

Funeral services were conducted on Thursday, May 10, 2018, 11:00 a.m. in the chapel of Shackelford Funeral Directors with Rev. Terrell Gatewood officiating. Interment followed in Oak Grove Cemetery, Pocahontas.

BETTY RAY MAY GERMAN JANUARY 17, 1940-MAY 6, 2018

Betty Ray May German, age 78, resident of Toone, Tennessee and wife of the late James Andrew German, departed this life Sunday morning, May 6, 2018 at her residence.

Services of Remembrance for Mrs. German were conducted at 1 p.m. Wednesday, May 9, 2018 at the Peebles Main Funeral Chapel in Somerville with Bro. Willie Crowley officiating. He was assisted by Gina Powers. Interment followed in the Hood Cemetery in the Warren Community. Arrangements were provided by Peebles Fayette County Funeral Homes & Cremation Center - Main Chapel of Somerville.

Mrs. German was born January 17, 1940 in Middleton, Tennessee. She received her education in Braden, Tennessee and was married July 9, 1955 to James Andrew German. She was a homemaker throughout her life and a resident of the Toone area for 40 years. Mrs. German was a member of the church of Christ in Whiteville and she loved taking care of babies. She enjoyed singing and cooking. She was the strong heart of the family and will be remembered for being a thoughtful person with a contagious smile.

Mrs. German is survived by two daughters, Virginia Charlene German (Gordon Watts) of Memphis, TN, Lisa Carole German of Toone, TN; two sons, Billy Paul German (Kay) of Toone, TN, James Madison German (Jamie) of Toone, TN; her sister, Patsy Pitts (Glen) of Memphis, TN; her brother, J.T. May (Maxine) of Memphis, TN; twenty-one grandchildren and twenty great-grandchildren.

She was preceded in death by her husband, James Andrew German who died October 2, 2003; her parents, Jim Lee May and Velma Marie Blackwell May; three sisters, Lucille Gullick, Maxine Brooks, Dementia Stice; and her brother, Johnny May.

Those honored to serve as pallbearers were Matthew German, Johnathan Young, Andrew Young, Blake Vann, Aaron Gibson and Rickey Young. Honorary pallbearers were Gordon Watts, Dude West, James Ivy, Andy Ivy and Jeremy Russell.

The family requests that memorials be directed to New Life Ministries, 15400 Highway 64 East, Bolivar, TN 38008. Condolences may be left on our online guestbook at www.PeeblesFuneralHome.com.

William R. Snodgrass - Tennessee Tower

312 Rosa L. Parks Avenue, 11th Floor

Nashville, Tennessee 37243-1102 (615) 532-0625

PH Notice number TN0082040 - May 8, 2018

NOTICE IS HEREBY GIVEN, the Division of Water Resources proposes to issue a water quality National Pollutant Discharge Elimination System (NPDES) permit and will hold a public hearing pursuant to Rule 0400-40-05-.06 (8).

Place: Whiteville Community Center

151 East Main

Whiteville, TN 38075

Date: June 12, 2018

Time: 5:00 pm CDT Open House Informational Session

6:00 pm CDT Proposed Permits Presentation & Public Hearing

Public comments will be received concerning the proposed permit action described below:

The division proposes to issue an Individual, NPDES Permit #TN0082040 to Latitude Solar Center, LLC, located at 1630 Whiteville-Newcastle Road in Whiteville, TN 38075, Hardeman County, Tennessee. The permit is to authorize the discharge of storm water runoff associated with soil disturbance during construction of a solar power generation plant. Discharges are proposed from Outfalls SW1, SW2, SW3, SW4 and SW5 to Little Creek, Bear Creek and Clear Creek. The permit imposes conditions on the discharges to protect water quality. A final permit decision will be made in consideration of comments received.

Prior to opening the formal public hearing, an open house informational session will be held from 5:00 to 6:00 PM CDT. TDEC staff and the applicants and/or their design consultants will be available to answer questions and provide information during the open house informational session. At 6:00 PM CDT, TDEC staff and/or the applicants will provide brief presentations about the proposed permits and the formal public hearing will begin. Once the formal public hearing begins, the question and answer format will end and all public comments will be collected for the hearing record without response from TDEC staff during the formal public hearing. The hearing officer may limit the length of oral presentation in order to allow parties an opportunity to speak, and will require that all testimony be relevant to water quality issues. Written testimony will be accepted at the hearing, for ten days following the hearing, and will be considered part of the hearing record.

Interested persons may obtain additional information, a copy of the draft permit, the rationale and inspect and copy forms and related documents at the Division's Central Office at the address listed above, Attn: Ms. Elizabeth Rorie, (615) 532-1172, or at the Jackson Environmental Field Office located at 1625 Hollywood Drive, Jackson, TN 38305, (731) 512-1300.

Individuals with disabilities who wish to participate in these proceedings (or review the administrative file record) should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to June 12, 2018, to allow time to provide such aid or services. Contact the ADA Coordinator at (1-866-253-5827) for further information. Hearing impaired callers may use the Tennessee Relay Service (1-800-848-0298).

You may reach Ms. Ariel Wessel-Fuss, the permit writer for further information at (615) 532-0642, or by Email at Ariel.Wessel-Fuss@tn.gov.

OUR COUNTY

A Red Hill Get-Together by Lesa Jones

It all started as a fun conversation on Facebook amongst old friends from the old neighborhood. We'd remember how we had fun playing outside all day, visiting each other's home, dining at Mr. Bud's (McKinzie) café, walking to Mr. Jessie Lax grocery store and occasionally listening to the train as it passed through. We automatically had neighborhood watchers called parents. Each and every kid had adults from different households that took care of us all and scolded us when needed — the true meaning of 'it takes a village'. Our neighborhood was a fun place to be as all other neighborhoods in Bolivar. We called our area "Red Hill". It consisted of families around the vicinity of Keller Street, N. Union Street, N. Lauderdale Street, parts of Tate Road, Neely Street, N. Polk Street & Butler Street.

After chatting about our innocent days of living amongst each other, we started thinking of having a get-together. And then after years of talking about it, we finally got together and had a fun time reunion. On March 24, 2018, we had a memorable gathering at Bolivar Municipal Center.

So many have departed since our days of growing up, but we still had a couple of attendees from the 'Silent Generation' (born mid 1920s—mid 1940s). And then there's the 'Baby Boomers' (born mid 1940s—early 1960s), the group that's still going strong. It's up to us (Baby Boomers) to keep this going.

A good time was had by all on March 24th with talks of doing it again on next year. Many attended, but hopefully on next year, the attendance will grow bigger and better, including 'Generation X' (born mid 1960s—early 1980s). If you know of anyone that grew up on 'Red Hill', let them know that we've started something that's going to continue as many times as possible.

There's some that still remain in the neighborhood, as others began moving out during the early 70s & 80s. Even though we moved to a new home, my heart and core upbringing, still belong to 'Red Hill'.

Baby to Grad

Honor your Special Graduate in the Bulletin-Times Graduation Section, May 24, 2018.

DEADLINE: FRIDAY, MAY 18, 2018

Send check or money order for \$15 per graduate along with baby and grad pictures to:

Bolivar Energy Authority, your local publicly-owned electric utility, says if you use your air conditioning less, you'll spend less on your cooling bill.

These simple steps will help:

- Use a dehumidifier to decrease moisture from summer air.
- Plant shrubs or trees to shade your central air conditioning unit.
- Set your thermostat at 78 degrees Fahrenheit.

Call Bolivar Energy Authority for more information.

Incorporated in 1936, Bolivar Energy Authority serves Hardeman County and parts of Fayette, Chester, Madison, and Benton (MS) counties. The Bolivar Energy Authority covers 1,350 miles of lines with an average of eight customers per mile.

Boxing Brings More than Rights and Lefts

by Tawanda Wright Carr

Obie Beard, former Jackson Boxing Club champion boxer, responded affirmatively when invited by Bolivar Mayor Julian McTizic and City Councilman Jonathan Joy to bring Jackson Boxing Club to Bolivar. The objective is the give local residents, alternatives to street life. When asked how boxing helped him, Beard responded, "I have been boxing since I was 5. A rigorous training schedule left me no time to get into trouble". Local residents need activities to help occupy idle time that is often used the wrong way. Obie Beard claims, "Idle minds have always been the Devil's workshop!" A resident, seeking down time activities for her brother, was thrilled at the mention of the boxing club coming to the community. She stated, "I believe boxing is an alternative to unleashed aggression and could curtail or minimize the illicit use of firearms." Every community wants to feel safe. Jackson Boxing Club has been helping youth shape their lives, learning discipline and self-respect, finding an outlet for

anger and idleness, forming bonds and lasting memories, for over 50 years. What a legacy to bring to Bolivar.

Nostalgically, Beard looks back on his heyday as one of Jackson Boxing Club's success stories, admitting that boxing took him to places he would never have seen, led him to experiences he would never have imagined possible. Boxing has the opportunity to open doors for youth who may have few opportunities for success otherwise. Boxing, according to Beard, made him want to achieve more. Boxing showed him he was capable of success. Boxing showed him the look of success, having watched his brothers create their own legacies with the same organization. Beard recalls studying at Lane, working two jobs and training for the Olympic team. His goal was to make the Olympic team as his elder brother had in 1980. Boxing kept his focused and goal oriented, earning him a scholarship from the USA Amateur Boxing Federation. Although life has taken

him to other business endeavors, Obie Beard believes that he can continue to offer the community support and youth would always benefit from a regiment of rigorous exercise and examples strong leadership. The pride of heritage and sense of belonging that comes with becoming a part of the team of young boxers is invaluable and timeless.

In 1978 Jackie Beard and Donald Bowers brought Golden Gloves National Championships to Jackson. Jackie Beard made history by winning the National AAU Championship three consecutive times. "When our fighters came to the ring, our opponents knew they had a fight." Obie remembers their reputation for being well-trained, disciplined and extremely fit. "ABC Sports aired our fights and we sold out arena", Obie recalled. "Boxing can put small towns on the map". Boxing can help discipline and guide youth, as well as bring revenue to small towns. The legacy that Rayford Collins began with the boxing club from Bemis,

more than 55 years ago, can continue with new blood. Youths can look forward to amazing opportunities that the Beard boys showed to be at arm's reach. What young man would not dream of fighting for the U.S. Olympic Boxing Team? What young fighter would not dream of fighting his way to No. 1 world rank in his division? Fighters from the Jackson Boxing Club made history. Jackson Boxing club can do this for Bolivar.

Star PT Hardeman County Sports Notes

Bolivar and Hornsby's Middle School Golf Team finished their regular season May 4. Bolivar Middle golfers include three 8th graders, Alora Lax, Tyler Pierce, and Claydon Spain. Hornsby golfers are 7th graders Kendall Adkins and Gunnar Barnes, along with Tucker Parker, 6th grade. The team is coached by Kim Sain.

Photo left to right: Tucker Parker, Tyler Pierce, Gunnar Barnes, Claydon Spain, Kendall Adkins, Alora Lax.

Former Bolivar Central basketball players Nick Beauregard and Cameron Crisp will offer players 5-16 their annual basketball camp from July 9-13 at Bolivar Central High School.

Bolivar Parks and Recreation offers a Pickleball Clinic at the Bolivar Municipal Building in Gym on Mondays and Fridays from 9 a.m. until 11 a.m. For more information, call 658-7529.

Bolivar Central Softball saw their first winning season in a long time come to a close with a third place finish in the district tournament. Central fell 10-2 on May 8, to Covington, dropping Bolivar's record to 15-14 on the year.

"I can't tell you how proud I am of our girls. We have come a long way in four years. Ending with a winning season is a great feeling, but seeing our girls bond and really love on each other is what it's all about. I can't say enough good things about this team and it's only going to get better," said Head Coach Dylan Hill.

Bolivar Central Baseball put on a late season surge to finish third in the district tournament, finally bowing out with a 10-0 loss to Haywood on May 8.

The Middleton Girls Softball

League began their opening night of play on May 8 with a pair of games.

In game one, The Grove beat Centennial Bank 15-14 in a 4-6 year old contest and game two went 21-4 in favor of Serendipitee over Wood and Sons in 8-12 year olds game.

The season is scheduled to continue through June 12.

Bolivar Central Tennis player Ryan Sanders fell in the semifinals as did Sadie Richardson and Meredith Owens in doubles.

All three players were named to the All-District team for the season.

Farmers Market Shaking Off the Winter Chill by Ginger Tester

Since Old Man Winter seemed to overstay his welcome for many this year, only a handful of vendors have made an appearance at the Farmers Market on the corner of Washington and Lafayette Streets in Downtown Bolivar. According to new farmers market manager, Mike Malone, "It usually starts out slow, but this year will be slower due to cold weather." Low temperatures have held up the availability of tomatoes and cucumbers, while cold weather crops like strawberries and lettuce seem to be doing okay. It did keep farmers busy though, as several trips to the fields to cover plants were necessary. Some plants didn't make it and the cold stunted the growth of others. But after an extra-long winter, it appears that spring is finally here...we hope.

While fruits and vegetables may be off to a slow start, the Bolivar Farmers Market's selections of fresh eggs, catfish, and beef is abundant, and many vendors also offer variety of jams, jellies, baked goods, and handcrafted items. Stop by the Bolivar Farmers each Saturday and Tuesday from 7:30 a.m.

to 3:00 p.m. Call market manager Mike Malone at 731-659-1521 for information on how to participate. The Bolivar Farmers Market is part of PickTennessee Products.

Photo: Market Manager Mike Malone (center), and longtime vendors, Bill and Carol Deen.

Adoptable Animal of the Week by Sara Vonderheide

Girlie #8302 is a young adult, female Labrador mix. This poor girl has been at the shelter for more than two years. She came to the shelter heartworm positive but has been treated, and now she is ready for her forever home. Girlie is sweet, but it takes her a little while to get comfortable with new people. Maybe this is why she is still at the shelter. She needs someone who will be patient with her. Once Girlie gets to know you, so is very playful and loving. Girlie deserves a life outside of the shelter and with a family of her own. If you are interested in adopting Girlie or any of our wonderful dogs at the shelter, please contact a volunteer: Charla Cooper at 731-234-4421 or Jennifer Smallwood at 731-609-0408. You can also check out our Facebook page, Hardeman Adoptable Animals, Inc. You can also come to the shelter. We are located inside the county landfill (Walton Road), and volunteers are there between 9-1 each day. HAA, Inc. is a 501(c)(3) not-for-profit organization. Adoption fees are \$125, and this includes all vaccines, spay/neuter, and care while at the shelter.

If you would like to send a memorial or an honorarium to HAA, you can mail a check to HAA, Inc. at PO Box 513, Bolivar, TN 38008. Or you can donate through PayPal (see our Facebook page). All donations are tax deductible. Please specify whether you are donating to the building fund or the general operational fund and who the donation is in memory or in honor of. We also like to send acknowledgements of such gifts, so please include the name and address of who to send a note to.

Please remember that mosquitos are back! Keep your pets on heartworm prevention. It only takes one bite to infect a dog!

Tea for Two for the Home Tour

Along the garden path, past the century old English Boxwoods and next to the stable at The Columns, Lilac Cottage, was the setting for a children's afternoon tea party that was part of the APTA's 44th Heritage Home Tour on May 6. When the Ingrams bought The Columns in 1909, they brought this children's playhouse onto the property with them. The Mother Goose paintings inside the playhouse were done several years ago by a local artist.

HARDEMAN COUNTY COMMUNITY HEALTH CENTER

Let Us Be Your Medical Home

We are proud to announce the addition of

Dr. Thomas Caruthers
OB/GYN Physician

Dr. Thomas Caruthers is a Board Certified OBGYN Doctor, with over 20 years of work experience. He received his Bachelors of Science Degree from Tennessee State University. He graduated from Medical School at Meharry Medical College in 1992. He did his Obstetrics & Gynecology Residency at Wayne State University School of Medicine in Detroit, Michigan.

Prior to joining our practice, Dr. Caruthers had his own Practice (Premier Women's Care) in Covington, Tennessee, and did deliveries at many hospital in the West TN area.

Dr. Caruthers will be providing women's health services, gynecological procedures, and prenatal care for pregnant women in their First and Second Trimesters. He will be referring out women with high risk pregnancies, women in their Third Trimester, and for deliveries.

Dr. Caruthers will be working at Bolivar Health Center on Tuesdays and Wednesdays, and Stanton Health Center on Mondays. Dr. Caruthers and his family live in Atoka, TN.

NCOA is a private non-profit organization dedicated to improving health care quality.

What's Kasasa?

Free Kasasa checking rewards you in ways you might not think a community bank could. But the best part is, you don't have to go to some big bank to get it.

3.00% APY*
on balances up to \$10,000 if qualifications are met

0.01% APY*
on all balances even if qualifications aren't met

*ATM minimum deposit is required to open the account. Monthly ACH Credit or ACH Debit and automatic bill pay are not eligible. **2 debit card transactions are a condition of this account. Limit of 1 account per social security number. There are no recurring monthly maintenance charges on this account. Receipt of an electronic statement is a feature of the account. However, the customer may opt to receive a paper statement for a monthly fee of \$2.00. If the account does not meet qualifications for all night period, the account will be converted to a NOW account. Contact your bank service representative for additional information, details, restrictions, processing limitations and enrollment instructions.

*Qualification information: Account transactions and activities may be eligible or more likely to qualify for the account and all must be during the Monthly Qualification Cycle. (1) Daily balances up to \$10,000 receive an annual percentage yield (APY) of 3.00% and balances over \$10,000 earn 0.25% interest rate on the portion of balance over \$10,000, resulting in a range from 1.00% to 3.25% APY depending on the account's balance and (2) you will receive unlimited reimbursements for cashless ATM withdrawal fees imposed by the ATM and other financial institutions and incurred during the Monthly Qualification Cycle in which you qualify. An ATM receipt must be provided to reimbursements of individual ATM withdrawal fees of \$3.00 or higher. See website for ATM withdrawal fees based on estimates when the withdrawal information we receive does not identify the ATM fee. If you have not received an appropriate reimbursement, we will adjust the reimbursement amount if we receive the transaction receipt within the calendar time of the withdrawal transaction. When Kasasa Cash qualifications are met, all balances in the account earn 0.01% APY and ATM withdrawal fees are not included. Reward payments and ATM fee reimbursements will be credited to the appropriate Kasasa account on the last day of current payment cycle. APY is Annual Percentage Yield. APY accounts are subject to FDIC 1217. Rates and rewards are variable and may change after account is opened. Fees may reduce earnings. Additional information: Account approval, conditions, qualifications, limits, restrictions, restrictions, log-ons and other requirements apply.
